VOLUME LXVI., NUMBER 5. REDWOOD CITY, SAN MATEO COUNTY, CALIFORN IA, SATURDAY, MAY 1, 1926. ESTABLISHED 1859

GRADUATE TALKS TO EXCHANGE CLUB

Physical Education was the topic of an address given before the Redwood City Exchange Club last Tuesday at their regular weekly meeting at the Fox Shoppe by Dudley DeGroot, Sequoia and Stanford athlete. De Groot was a graduate of the high school here with the class of 1919. While at Sequoia he made quite a record as an athlete and after entering Stanford became one of the star athletes of that institution. He was captain of the Stanford football team in 1922.

DeGroot has maintained his interest in athletics since his graduation from Stanford and has been a sport writer on a number of large papers. He has made several trips to Europe, where he studied physical education on the continent. He played on the Rugby team which represented the United States in the Olympic game. It was of these trips and his experiences in some eighteen foreign countries that De Groot spoke. He spiced his talk with a great deal of humor, which was thoroughly enjoyed by the club.

Miss Desiree Heydenfeldt and Miss Artha Gordan sang several songs which were heartily received by the Exchangites.

In connection with the talk of the evening, a film on physical education was shown by Frank Griffin, athletic coach at the high school.

Jerry Stebenne presided over the meeting and Frank Griffin was the chairman of the evening, which proved to be one of the best meetings of the newly organized service club.

—o0o—

FUNERAL SERVICES HELD FOR LA HONDA PIONEER

Funeral services were held Wednesday at the parlors of Tinney and Layng for Frank Bestachi, pioneer rancher of La Honda, who passed away at the Frank Bisani ranch last Saturday. The deceased was a native of Switezrland and was 75 years of age. He leaves no relatives here. The service was conducted by Rev. C. E. Kenedy and were folliwed by interment in Holy Cross cemetery, Menlo Park.

—o0o—

Harlod Hale, who has been visiting at the home of Mr. and Mrs. W. J. Thomas on Birch street for the past few weeks, left Monday for Seattle. Mr. Hale is from Maine and expects to spend the entire summer on the western coast visiting many of the principal cities before returning to the east.

This evening the members of the Epworth League of the local Methodist church will go to Kings Mountain where they will enjoy a camp supper and a camp-fire gathering.

Walter Arends, son of Mr. and Mrs. A. A. Arends of Wellesley Park, arrived home this week from a trip on the Pacific, which took him to China, Japan and the Islands. He left again the latter part of the week for Seattle and northern coast ports, where his ship will load with a cargo for foreign ports.

MASONIC SCHOOL WEEK PROGRAM WELL ATTENDED

An interesting and instructive program was presented last Tuesday evening at the auditorium of the Sequoia Union High School in observance of School Week. The program was presented under the auspices of Redwood Lodge No. 168 F. and A. M., and was for the purpose of carrying out the campaign for creating a greater interest in matters pertaining to the public schools.

The program Tuesday evening was one of great interest and considerable variety. Musical numbers were supplied by the Girls' and Boys' Glee Club of the high school, trained by Prof. Otis M. Carrington and by the Girls' Chorus of the Grammar Srhool, trained by Miss Bresse. Representatives were present from various organiations of the city.

Philip Brand, master of the local Masonic Lodge, introduced the chairman, Elmore B. Hinman, president of the Redwood City Chamber of Commerce. Roy W. Cloud, city superintendent of schools, and A. C. Argo, principal of the high school, addressed the audience on the problems of their respective schools. Miss Pansy Jewett Abbott, county superintendent of schools, gave an interesting address, and praised the movement which has resulted in the annual observance of Public School Week. Representatives who spoke for other organizations of the town were Frank K. Towne, president of the Kiwanis Club and Oscar Olson, representing the Exchange Club.

—o0o—

LARGE CLASS RECEIVES UNITED STATES CITENSHIP

A large class of aliens was adopted by the United States as nephews and nieces of Uncle Sam a an examination for naturalization held in the Superior Court here Tuesday. The examination was carried on before District Director of Naturalization Paul Armstrong.

Those granted citizenship at this time together with their places of nativity and residence are as follows:

Oluf Nelson, Burlingame; Norway.

Herman de Vries, Menlo Park; Germany.

Margaret Holman Rice, Redwood City; England.

Joseph Bacchetto, Burlingame; Italy.

William George Singer, Menlo Park; Germany.

Carlo Lucchesi, South San Francisco; Italy.

Ferderico Lombari, South San Francisco, Italy.

Luigi Maggi, South San Francisco; Italy.

Paul Sembach, Burlingame, Germany.

Alessandro Toso, Burlingame; Italy.

Juseppe Appia, Menlo Park; Italy.

Enrico Baldasserani, South San Francisco; Italy.

Peter Duzanica, Redwood City; Dalmatia.

Olive Cortesi, South San Francisco; Italy.

Chiffredo Pasero, Colma; Italy.

Charles Banks Letts, Burlingame; England.

Frank McKernan, Millbrae; England.

Erbert Edwin Nowell, San Mateo; England.

Elizabeth Vail Nowell, San Mateo; England.

Peter Marion Petrog, South San Francisco; Bulgaria.

Pompeo Righetti, Redwood City; Switzerland.

Attitlio Sagnorelli, Belmont; Italy.

Soren Christian Sorensen, San Mateo; Denmark.

Barbara Anne Spuehler, Redwood City; Switzerland.

Louis Morel, Burlingame, Switzerland.

Joseph Henry Hurlbut, Burlingame; Nova Scotia.

As usual the General George S. Evans Camp Woman's Relief Corps held a short patriotic service and an interesting address was given by John Gill vice-principal of the Sequoia Union High School.

—o0o—

P. G. and E. EMPLOYEES MEET AT FOX SHOPPE

About 85 employees of the Pacific Gas and Electric Company's local department met at the Fox Shoppe on the highway Tuesday noon for an interesting reunion. An entertaining program had been arranged including musical numbers by Miss Gladys Cronk and by Ed Jennings, both of the local office.

The chief speaker of the occasion was Roy W. Cloud, city superintendent of schools, who spoke on early California history. His address was much appreciated. Walter Kellogg, manager of the Redwood City district of the company, acted as chairman of the meeting and introduced the different entertainers. John Kuster, manager of the San Jose district, of which this division is a part was a guest of the local people as was also W. F. Neiman of the San Jose head office.

MAN MEETS DEATH IN AUTOMOBILE ACCIDENT

Edward Clawson, a driver for a perculator company of San Jose, was killed almost instantly in an automobile accident that occured near Selby Lane onthe highway shortly before noon yesterday. Clawson was going northward in a Ford machine and collided with a Cadillac driven by Mrs. Maskkey wife of the well-known San Francisco candy dealer. She was driving south. Her car was badly wrecked and Mrs. Maskey was seriously injured. Clawson was rushed to the Redwood City hospital, where he expired in a short time. His head was almost severed from the body. The body was taken by relatives to the James Crowe Undertaking parlors.

Clawson was a resident of San Jose.

—o0o—

PURISSSIMA RANCHER SHOOTS NEIGHBOR

Giacomo Tomei, a rancher in the Purissima canyon district, shot and seriously wounded Tony Lewis, another rancher of the same vicinity Thursday morning. Tomei is now lodged in the county jail and Lewis is in the Mills Memorial hospital. Surgeons have found it necessary to amputate the arm of the wounded man and his condition is stil considered serious.

The attack, which was made at the Lewis home while the family were at breakfast, is thought to be the result of a sudden attack of insanity. Tomei entered the Lewis home with a shotgun and ordered Lewis to hold up his hands, Lewis compiled with the request and Tomei, is said to have shot him while in this position. The shot shattered the bone of Lewis' arm near the shoulder.

Constable Fred Simmons was summoned, and he with Deputy Contable Joe Gravance organized a posse and notified the sheriff's office. Tomei hid in his house and threatened to shoot the arresting officers, but when he saw that the house was surrounded he surrendered and was throught to the jail here. The wounded man is under the care of Dr. W. A. Brooke of Halfmoon Bay.

—o0o—

The Baptist Church service Sunday will be of special interest. A band of young people from the Bible school who were baptized on Easter Sunday will be formally welcomed into the church, with others, and receive communion for the first time. This service will be at 11 o'clock. Rev. William E. Robinson of San Francisco will be a guest and preacher at both morning and evening service.

WOODSIDE

William Bark returned to Woodside on Thursday after an absence of three weeks. Most of his time was spent in Seattle and Aberdeen, although he made a hurried trip to Los Angeles as well. Mr. Bark is interesting himself in finding a market for a certain species of alder that grows extensively on his Washington lands, and is just coming to be recognized as an excellent cabinet wood.

Rudolph Schilling and family family are in Woodside after a year in Europe. Mrs. Schilling and the boys spent most of the year in southwestern France, where the boys attended school, while Mr. Schilling traveled in various parts of the continent.

Mr. and Mrs. William Roth moved into their home here for the summer season on Thursday. Young William is suffering from an attack of measles.

Mr. and Mrs. Harold Allen, formerly of Woodside, visited here on Sunday last.

Mrs. Jos. L. Ross, Jr., is spending a week in Berkeley as the guest of Mrs. James W. Wright.

Mrs. Edward Grenfeld has been occupying Dr. Ross' house at "Little Forest" for the past week.

The local school repaired to the Sequoia High School grounds on Friday for the annual play day The day was greatly enjoyed but accident and sickness had taken such toll of the local atletes that Woodside did not maintain the record for athletic supremacy established last year. George Shine's sprained ankle, Raymond White's wrenched knee and the illness that has held Roger Komstoeft to his bed for ten days robbed us of our hopes of athletic eminence.

Great preparations are being made for the Firemen's ball to be held on Saturday night, the official opening of the Woodside Fire District.

Bennett Bartholomew was given a surprise party on Thursday night by his mother, Mrs. L. C. Burnett.

The circus fever struck this village on Wednesday and Thursday, affecting old and young alike. It nearly proved fatal to some of the youngsters who felt that no life could be better spent that one devoted to the care of the elephants and camels.

CITY BRIEFS

C. M. Doxsee and Charles Dimmitt left Thursday for Los Angeles on business.

Roy W. Cloud addressed a meeting held at Vacavile last evening in observance of Public School Week.

Mrs. Earl Rush was hostess to a number of her friends at her home on Harrison street Wednesday afternoon. Those present were Mesdames Clifton Woodhams, Perry Downs, Wilbur Doxsee, oJhn Rhoda, A. P. Whitehead, A. W. Tate, aJmes Wallace and Earl Rush. Sewing and refreshments were enjoyed.

Mrs. John McCrae is spending a few days visiting with Mr. and Mrs. S. P. McCrae in Madera. She is expected home tomorrow.

A special program was enjoyed by the local lodge of Odd Fellows Wednesday evening in commeration of the 170th anniversary of the founding of Odd Fellowship in this country.

Catherine McBride Hosier, national president of the Woman's Relief Corps, was honored last Monday by an elaborate dinner at the Hotel Whitcomb in San Francisco. This affair was attended by nine members of the General Geo. S. Evans post of the organization. Those who attended from here were Mrs. Geraldine Frisbie, past national president; Mrs. Harry Potts, Mrs. Jos. J. Hahir, Mrs. Mary Winter, Mrs. T. C. Rice, Mrs. Burton Barteaux, Mrs. George W. McNulty, Mrs. D. P. Flynn and Mrs. Donnelly.

Native Sons—Frank McAuliffe, chairman, Louis Lodi, Chas. Curran, W. Mallory, Ed Randolph, Staney Marcus and Bud McKay.

Local Odd Fellows and Odd Fellows from Palo Alto will make a joint pilgrimage to the Odd Fellows' home at Los Gatos on May 8th.

A card party will be held Tuesday afternoon by the Mount Carmel Ladies Aid in the clubrooms of the Carmel Mens Club on Warren street. A committee consisting of Mesdames J. P. Coleman, S. C. Caldwell, J. Cashman, C. Cullen, J. Dickey and A. Donovan is in charge of the preparations for the event.

Mr. and Mrs. George Davis and family of Millbrae visited Mr. and Mrs. has. Lambert and family here Thursday and attended the circus in the evening.

B. E. Myers, who was called to Indiana several weeks ago by the serious illness of his mother, returned Wednesday. Mrs. Myers is considerably improved in health

A. W. Pike, the well known importer and wholesale hardware man left on Wednesday for a trip to Honolulu to be gone for six weeks. He goes on business to the islands where he has many customers.

Committees of both Redwood Parlor N. S. G. W. and Bonita Parlor N. S. G. W. are buy with preparations for the observance of Mothers' Day. The following form the committees of their respective lodges:

Native Daughters — Mesdames Phil Bozzo, Fred Glennan, C. L. Collins and the Misses Ruth Kirste Belle Mirandette and Margaret Rice.

Miss Rita Osborne spent the week end with Mr. and Mrs. P. R. Preston in Reno, Nevada.

DUMBARTON ROAD PERMIT GRANTED

The state railroad commission has granted the board of supervisors of ths county permission to construct a portion of county road across the tracks of the Southern Pacific Company's Dumbarton cut-off to connect Willow road, south of Redwood City, with the existing terminus of the approach to the new Dumbarton barton bridge.

The supervisors some time ago appointed D. E. O'Keefe. George Kneese and H. C. Tuchsen viewers to go over this portion of the road and report in order to declare it a public highway. The strip contains 225 feet leading from the proposed Dumbarton new road to the Willow road and over the Dumbarton railroad tracks. The board of supervisors at a recent meeting directed one of the local abstract companies to look up the public status of the Willow road, with a view of declaring it a public thoroughfare. This road has been opened for more than fifty years but some of the abutting property owners claim it a private thoroughfare in as much as it is a culdesac. This road is the main approach to the Dumbarton bridge. It is declared a public highway the board of supervisors will macadamize it and widen the road so that it will be one of the finest in the county.

JOHN E. HARRIS IN SAN JOSE

John E. Harris, former resident of this city and for a number of years printer on this paper, passed away at his shop in San Jose yesterday. The deceased was 72 years of age and while he had been in poor health for a number of years he remained actively engaged at his trade until the last and fell upon his press when the last summons came.

Harris was born at Milpitas and learned the printers trade in San Jose. For many years he was connected with the San Jose Mercury and later went to Portland, Oregon. From there he came to Redwood City and took a position on this paper which he maintained for many years. Later he went to San Jose and has been engaged with his son in the printing business.

Surviving the aged man are his widow, Mrs. Lou A. Harris, two sons, L. E. Harris, Frank Harris, a brother, M. C. Harris of San Francisco and four sisters.

The deceased was a member of Redwood City Lodge No. 168 F. and A. M. and of Embacadero Camp of Woodmen. He is also a member of the I. O. O. F. lodge of San Jose. Arrangements have not been completed for the funeral but it will probably be conducted by the Masons and Odd Fellows.

—o0o—

ENTERTAIN FRIENDS AT HOME ON BIRCH STREET

Mr. and Mrs. Joe Gibson entertained a few friends at their home on Birch street Wednesday evening. Dancing was enjoyed and the hostess served light refreshments to the guests who included Messrs. and Mesdames W. J. Thomas, H. Ferguson, Thos Clark McTarnahan, Ellis Ensor, George Bell and S. L. Netherton.

CHAMBER OF COMMERCE DISCUSSES ANNEXATION

An address favoring the annexation of this county to San Francisco was made Monday at the regular weekly meeting of the Redwood Citi Chamber of Commerce. Adolph Uhl of San Francisco was the speaker and he spoke in favor of annexation with the borough system. Julius Smith of the realty firm of Whitcomb and Smith, was the chairman of the meeting.

Fire Chief Mark Ryan addressed an appeal to the general public to aid in the prevention of fires by clearing up vacant lots and other fire menaces before the dry weather made fire dangerous.

President E. B. Hinman appointed Mayor Beeger and D. R. Stafford to represent the local organiaztion at a meeting of the Peninsula Chamber of Commerce Federated which was held last evening at Burlingame.

—ooo—

POULAR LOCAL COUPLE WED SATURDAY IN S. F.

At a pretty wedding at Grace Cathedral in San Francisco officiated by Rev. E. H. Molony, formerly of the local Episcopal parish, Miss Margaret Holmquist became the wife of Stanton Mullen. The wedding is one of great local interst as the young peope were both very popular and prominent in social affairs of this city.

The bride is the daughter of Mr. and Mrs. R. C. Holmquist. She is a graduate of the Sequoia Union High School and for the past year has been employed in the San Francisco office of the Pacific Gas and Electric Company. She is a very pretty girl and has a host of friends here and throughout the peninsula.

The groom is the son of Daniel E. Mullen of this city, and is one of the most popular young men of the community. He is a graduate of the high school here, having been a member of the class of 1916. During the war he made a splendid record in France and took part in all of the major fighting in that great struggle, except for a time when he was confined to a French hospital with wounds received at the front. He is prominent in several fraternal organizations of the city and devotes much of his time to Boy Scout work in this city. He is scout master of Redwood City Troop 105

Attending the young couple at their wedding were Mr. and Mrs. Glenwood Joy, who were married in Vallejo a few weeks ago. The ceremony was witnessed only by the relatives and a few close friends of the parties. Following the ceremony they left for a honeymoon to be spent in the northern part of the state.

Upon their return they will make their home in Hayward for the present as Mullen is engaged there instaling the electrical system in the new high school.

—ooo—

WEDDING ANNIVERSARY CELEBRATED

The anniversary of their wedding was pleasantly celebrated by Mr. and Mrs. W. J. Thomas of this city last Saturday evening by a dinner party at Noah's Ark in San Mateo, followed by an informal party at the home of Mr. and Mrs. Joe Gibson on Birch street. Those who helped Mr and Mrs. Thomas celebrate the happy occasion were Mr. and Mrs. Joe Gibson, Mr. and Mrs. S. L. Netherton and Harold Hale.

LOCAL BANK TO OCCUPY NEW QUARTERS

The Bank of Italy today is moving into the new section of the bank building which is now being finished outside The interior of the new section is practically completed. This change is made necessary from the fact that the old building is being enlarged and practicaly rebuilt while still in use. Business has been carried on in the old part during the construction of the new section. This old part will now be abandoned, torn down and rebuilt in the same manner that the new section was built.

When completed the bank will have about twice the space which the old bank building furnished and will be much more convenient. The rapid growth of banking in Redwood City has made the present quarters of the Bank of Italy too small to handle the customers.

—o0o—

STRANGE COINCIDENCE IN PRIESTS DEATH

Father John E. Cottle, who died in San Francisco last week, was a classmate of the late Judge E. F. Fitzpatrick, and the last of the famous class of 1877 of St Mary's College. The last three survivors of the class were Edward McGanney, a noted New York lawyer, who died a short time ago and by a strange twist of fate the remaining two passed away within a week of each other. The class of '77 was made up of men who became prominent in the different professions throughout the state. The late Father John Sullivan, a pastor of Mount Carmel church for many years before his death in 1920, was also a classmate of the deceased clergyman. Four priests, John Coyle, John McGinty, John Sullivan and John Cottle, known as the four Johns were ordained on the same day at Montreal Seminary in 1880. The four Johns labored in the bay counties and every year on the anniversary of their ordination the four priests met at the home of Father Cottle and where over the dinner able, they would recount the happy incidents of school days. The priests erected a large monument in Holy Cross cemetery on the apex of which is a statute of St. John and a niche placed in the Mausoleum suitably inscribed for each of the priests. By the death of Father Cottle the monument is complete and the schoolmates will sleep together in that long last slumber.

Father Cottle delivered the eulogy at the obsequies of Father Sullivan and those who had the good fortune of listening to the burning words of eloquence speak of it as a masterpiece

The eloquent priest closed his address in the following words:

"And now my Dear Father John, with this brief tribute of respect to your memory, I bid you farewell Farewell until we meet agin. We will lay you to rest by the side of the two companions you loved so well in life. Your brother clergy will offer up the holy sacrifice of the mass for the repose of your soul, and your relatives, friends and parishioners will follow you with their prayers and supplications that God in his mercy may hasten your entrance to that abode of bliss were the hopes of all of us are centered.

As the last of the four it will be with a deep sense of lonliness that I will kneel beside your grave and see the shadows lengthen as they deepen into night; but what after all, does it matter if only, as is my abiding hope, the morning breaks bright and glorious on the shores of that everlasting kingdom, where Christ receives with mild and gentle countenance those who have striven to labor in his service."

—ooo—

OLD TIME RESIDENT HERE WITH CIRCUS

S. S. Stambaugh, who was born and raised in Redwood City and who is a nephew of Dr. Stambaugh, one of the best known residents of this city in the very early days of the county and after whom Stambaugh street was named, returned here this week with the Al G. Barnes circus. Stambaugh has charge of the lighting of the circus and has travelled to all parts of the world since leaving here many years ago. He expressed great surprise at the change which he saw in his former home town, and found that few of his old friends remain. He found Andrew MacPherson, however, and renewed a friendship of many years standing. The two men had an enjoyable visit recalling the days of long ago.

—ooo—

Francis E. Merryfield was granted an interlocutory decree of divorce from William H. Merryfield Monday by Superior Judge George H. Buck. She charged extreme cruelty. There are no children.

CONGRESSMAN FREE WRITES ON HARBOR SURVEY MATTER

E. B. Hinman, president of the Redwood City Chamber of Commerce, received yesterday a letter from Congressman Arthur M. Free in regard to the Redwood City harbor development. Congressman Free has been very active in furthering this matter in Congress and promises to give it his attention in the future. His letter follows:

Mr. E. B. Hinman, President
Redwood City Chamber of Commerce.

My dear Mr. Hinman:

I have been intending to write you from day to day, but have been so crowded with work which needed my attention that I felt as long as the matter you were interested in had been attended to you would not suffer if I delayed writing.

I followed up the report of the District Engineer in regard to the harbor project. The board of engineers accepted the recommendation and have now ordered a survey for the purpose of determing the work that must be done and the cost thereof. When this report is prepared it will again come before the Army Engineers and then the matter can be taken up before the Rivers and Harbors Committee.

I suppose you think this is very slow, but for a matter of this kind it has moved along rapidly.

I hope the estimates will be in by the time the short session of Congress convenes in December, and I will then again take up the matter and endeavor to get an appropriation for the work.

The procedure in these projects is as follows:

1st. A general survey to determine whether the project is a worthy project.

2nd. The determination by the board of army engineers as to whether they will order a survey and estimate of cost.

3rd A survey and estimate.

4th Consideration by Army Engineers of report as to necessary work and cost.

5th If report of Army Engineers is favorable, then consideration by Rivers and Harbors Committee of the project.

With kindest regards and best wishes, I remain,

Very truly yours,
A. M. FREE

—ooo—

KIWANIS CLUB HOLDS HIGH SCHOOL MEETING

The regular meeting of the Redwood City Kiwanis Club was held this week at the Sequoia Union High School. An excellent meal was prepared in the high school kitchen and served at elaborately decorated tables in one of the rooms of the school. The meeting was held in observance of Education Week to give the members of the club an opportunity to see what facilities are offered at the institution of learning here.

James D. Hedge was chairman of the meeting and hurried the meeting through in order that the Kiwanians might have as much time as possible to inspect the school. Following the meal the party was divided into two groups and each given a guide. A. C. Argo, principal, escorted one party and Vice-principal John Gill, the other.

The Kiwanians were shown through the class rooms, gymnasium, manual arts building and other departments of the school. Most of the club men expressed surprise at the fine class of work being done by the students at the high school and the completeness of the equipment at the institution

BURGLARSCAUGHT AT ATHERTON; NOW IN JAIL

While many burglars find quarters in jail, it is seldom that one as obliging as John Mortensen is found, for Mortensen instead of causing the police a long and costly search made things quite convenient for his arrest.

It was last Monday that the home of Mr. and Mrs. Wijlard J. Classen in Atherton was burglarized and considerable jewelry removed. The burglars made a good job of it and left no clew so far as the officers could find. As luck would have it, however, a detail of the San Francisco police was in a sixth street pawn shop in San Francisco when two young men entered and tried to pawn some jewelry. The police were suspicious and attempted to place the two men under arrest, one was captured but the other escaped.

The captured man proved to be John Williams and as the jewelry resembled that stolen at Atherton, Sheriff McGovern asked that Mr. and Mrs. Classen meet him at the jail in San Francisco and identify their jewelry. They accordingly met at the San Francisco jail, and the sheriff asked the jailor to see the prisoner. McGovern was told that he was talking to someone in the conversation booth.

A check was made of the person to whom Williams was talking with a description given of the man who escaped from the pawn shop. He proved to be the same and the visitors was arrested. He gave his names as John Mortensen and confessed his part in the burglary. The Classens recovered all their stolen property.

—o0o—

RAZOR IS WEAPON IN COASTSIDE ROW

The razor, for many years a favorite weapon for setling personal disputes in the south, has made its debut on the coastside of this county, according to a report to the sheriff's office this week. Stefano Toriani, a rancher of Pescadero, this week swore out a complaint in the court of Ray Griffin asking for the arrest of Joe Fiorini, also of Pescadero. Fiorini was charged with attacking Toriani with a razor and cutting his face after the pair had had a fist fight.

Deputies from the sheriff's office went to Pescadero to arrest Fiorini, but found that he had already left and was hiding somewhere in the hills, where it is thought he is being concealed by friends.

RADIO

Above: Radio Making Rapid Growth—There Are Nearly 1,000,000 Radio Sets on Farms in the United States.

(Prepared by the United States Department of Agriculture.)

There are nearly 1,000,000 radio sets on farms in the United States, the Department of Agriculture estimates in a report on the growth of farm radio during the past few years.

In some cases the department says there are as many as 25 to 40 per cent of farms. Estimates made by the department in 1923 showed 455,000 sets in use on farms at that time, 365,000 sets in 1924, and 553,000 sets early in 1925.

Increased power and improved broadcasting, together with better receiving sets, the department believes, will do much to aid in establishing the permanency of the use of radio for the benefit of agriculture.

Interference among stations may gradually be eliminated, the department believes, as many of the less effective stations are being discontinued, and technical improvements are being made in both broadcasting and receiving equipment. Of 1,105 radio stations of all sorts licensed, broadcasting stations broadcasting began only 558 were active on January 11 this year.

Co-operative Arrangements.

The department has made co-operative arrangements with more than 100 stations for broadcasting official market reports gathered by department representatives in leading shipping and consuming areas. Since the first of the year the department has made arrangements with about 60 stations to broadcast on a regular schedule four additional services dealing with general agricultural information.

Literally hundreds of stations have requested the privilege of installing the government reports, but many of the requests have had to be refused the department says, because the stations are remote from the Department's market news branch offices.

"When the experimental radio market news service was announced on December 21, 1920," the report states, "those in the Department of Agriculture who were directing the new activity hardly anticipated the wonderful possibilities of radio broadcasting as we now know it. At laboratory transmitter at the United States bureau of standards on a 400-meter wave length, in the enthusiastic amateur station at Hundred miles of Washington, and at 2 p. m. schedule of about 200 words by radio telegraph, composing what was called the 'radio market grams,' constituted the elements of the experiment.

Amateurs Were Enlisted.

"Assuming an effective radius of usability of 200 miles about each station, licensed amateurs in the areas covered were enlisted to copy the reports and to furnish them to shippers' associations, county agents, state bureaus of markets, farm bureaus and other agricultural agencies, banks, newspapers and local telephone exchanges. A number of licensed operators offered to copy the reports. By January 1, 1922, the market reports were being relayed and broadcast by radio telegraph from seven post office stations in a chain across the country.

"During 1921 reports were furnished in three of the then very few radio telephone broadcasting stations. Since then, the service has grown by leaps and bounds until now there is practically no agricultural community in the country that is without official market reports on agricultural commodities. Well-established schedules of weather, crop and market reports broadcast from more than 50 stations in all parts of the country."

An authentic list of broadcasting stations in the country over that broadcast market and crop reports has been prepared by the department for free distribution. Requests for the list should be mailed to the Bureau of Agricultural Economics, United States Department of Agriculture, Washington, D. C.

FOREFATHERS OF RADIO

By GEORGE LEWIS
of The Radio Corporation.

Developments in radio transmission went ahead by leaps and bounds but the reception of signals was hampered by the lack of proper means for detecting them. Many men worked upon this problem. J. A. Fleming, for instance, invented the "valve" which was the forerunner of the radio tube developed by De Forest in this country. The detecting device which became most popular in the early days of radio was the crystal detector, as developed by Dunwoody and Pickard and introduced in 1906. By means of the crystal detector the received electric current is so modified that it will operate a telephone receiver.

Up to this time there had been no two radio stations that there was little difficulty about the signals of more than one station being received at the same time and interfering with one another. However, such difficulties were antiquated by other factors which overcame them.

The length of waves sent out by the transmitting station depends upon certain constants of the apparatus, just as the length of a water wave depends upon the object which causes the disturbance in the water and is responsible for the waves. Thus a cork dropped into a pond will send out little, short, choppy waves, while if a big ocean liner overturns the steam it makes will be followed by giant waves of great length. By adjusting certain parts of the transmitting apparatus one may control the wave length to which it will respond. This adjustment is called "tuning."

Thus, very early in the history of radio transmitting stations sent each other were tuned to different wave lengths, so that the operator of a receiving set could tune to any one of them.

J. A. Fleming.

Human Ear Deceives in Judging Volume

Few people realize the enormous range of the human ear. In pitch, a good youthful ear can hear all tones from as low as 16 vibrations per second to as high as 40,000 per second. The range of intensity is likewise enormous. If we take as one the strength of the weakest sound we can hear, then the strength of the ordinary talking voice will be a million.

In estimating the relative strength of sounds, our ears deceive us. For instance, when asking people about the comparative strength of two radio sets, one often hears them say that one set is twice as loud as another. When they say that they do not understand the peculiarities of the ear. On being questioned, they agree that the strongest set delivers as if it had one more stage of amplification than the weaker set. Now one more stage of amplification represents 20 times the power output, yet it seems only twice as loud. In other words, our ears are very poor at gauging the intensity of sound. This is a very necessary condition. If our ears were sensitive to changes in intensity they would either be insensitive to weak sounds or moderately loud noises would become unbearable.

The degree of the ear's sensitiveness to loudness can be well illustrated by the fact that it is difficult to distinguish between two sounds, one of which is twice as strong as the other. To successfully make the differentiation it is necessary that both sounds have the same pitch, the same quality of timber, and that the comparison be rapid.

Headphones

Never test batteries with headphones. The wire on the bottom is liable to be burned out thus destroying their usefulness. The headphone cord should never be allowed to hang low and come in contact with the storage battery because the acid will eat into it very quickly.

Many Listeners in England

Radio set owners in the British Isles now total 1,014,032.

NEWS REVIEW OF CURRENT EVENTS

Wiant Senator McKinley Defeat in Illinois Republican Primaries Means.

By EDWARD W. PICKARD

ILLINOIS Republicans administered severe jolts to the World court last week, and the opponents of American adhesion to that tribunal were correspondingly elated. Senator William E. McKinley was a candidate for renomination in the primaries and the fight against him was based solely on the fact that he voted for American membership in the World court. He was defeated by Frank L. Smith of Dwight by about 125,000 votes. Washington was watching the contest with intense interest, and such men as Senators Borah of Idaho and Reed of Missouri professed to see in the result a portent that other senators who supported the World court proposition would be retired and that ultimately the act of American adhesion would be repealed. Though there was no statement forthcoming from the White House, the administration forces were plainly somewhat disconcerted and the World court senators who come up for re-election this year did not conceal their anxiety. Norbeck of North Dakota and Brat of Kentucky already have been renominated, but the list also includes Bingham (Rep., Conn.), Broussard (Dem., La.), Butler (Rep., Mass.), Cameron (Rep., Ariz.), Ginning (Dem., Ark.), Gillette (Rep., Iowa), Curtis (Rep., Kans.), Dale (Rep., Vt.), Fletcher (Dem., Fla.), George (Dem., Ga.), Gooding (Rep., Idaho), Jones (Rep., Wash.), Lenroot (Rep., Wis.), Means (Rep., Colo.), Oddie (Rep., Nev.), Overman (Dem., N. C.), Pepper (Rep., Pa.), Shortridge (Rep., Cal.), Smith (Dem., S. C.), Smoot (Rep., Utah), Stanfield (Rep., Ore.), Wadsworth (Rep., N. Y.), Watson (Rep., Ind.), Weller (Rep., Md.), Willis (Rep., Ohio).

"Illinois," said Senator Borah, "has indicated the sentiment in this country against the League court. The campaign against the court will go forward as promptly immediately after the vote is in the senate. We have no intention of ceasing efforts until the matter is settled in the terms from which there is no appeal—until it is settled and settled right."

George E. Brennan, Democratic committeeman, running on wet platform, easily won the Democratic senatorial nomination in Illinois, which was highly pleasing to all wets. They also professed to see in the fact that Chicago voted in favor of boxing exhibitions an assurance that the people were getting to revolt against all sumptuary laws.

There is no of vague talk to the effect that the defeat of Senator McKinley, one of the strongest supporters of President Coolidge, indicates loss of prestige and popularity by the Chief Executive. The political guessers said if Republicans of other states followed the lead of those in Illinois there would be no lack of men to contest with Mr. Coolidge the presidential nomination in 1928. Chief of these, it was believed, would be Senator Borah.

SMITH W. BROOKHART was unseated by the senate as senator from Iowa and his place was given to Daniel D. Steck, who was immediately sworn into office. The vote Democrats to present Iowa in the senate since the Civil war. The vote was close—45 to 44. Fifteen Republicans voted to oust Steck and nine Democrats and one Farmer-Labor senator lined up with the Republicans who stood by Brookhart. It has been said that the contest before it is understood that Brookhart will enter the Republican primary in June as an opponent of Senator Cummins for the nomination.

AN AGREEMENT was reached in the senate to vote on the Italian war debt settlement on April 21, and the administration forces were confident that the house will approve the settlement without change by the commissioners would be passed.

The senate passed a measure to increase pensions of veterans of the Spanish war, Philippine insurrection and the Boxer rebellion and their widows and dependents in an aggregate of $18,000,000 annually. The measure went to conference for adjustment of differences between the house and senate provisions.

The senate military committee considering resolution which seeks information regarding the prosecution of Gentry Wheeler last summer was halted by the refusal of Attorney General Sargent to answer Senator Wheeler's questions. Mr. Sargent's refusal was based on the ground that the resolution was improper and that the information desired by Senator Wheeler should not be released because "publication would be incompatible with the public interest."

COMPROMISE has been reached in the controversy over the proposed Great Lakes-Atlantic canal. Both sides have agreed that the army engineers shall survey both the all-American route and the St. Lawrence route and report to congress next fall.

BEN W. HOOPER, W. H. McClintock and Samuel Higgs were reappointed by the federal railroad labor board by the President. Their terms will probably be short as it seems certain the Watson-Parker bill abolishing the board will be passed.

TWO measures contemplating development of naval and commercial aviation were passed by the house. One authorizes the $100,000,000 five-year naval aircraft program which would give the navy 1,014 new planes. The other creates the office of second assistant secretary of commerce for the regulation of commercial air transportation systems.

CHURCH labor and peace organizations through their spokesmen attacked the Lagger-Johnson bill for universal man power and complete government control of industry in time of war, before the senate military affairs committee. The measure has the backing of the secretary of war and the American Legion.

"WHAT we want is the strongest thing in enforcement and the weakest thing in liquor" was the statement of Mrs. Henry Peabody of Boston before the senate committee when the prohibition hearing was resumed last week, and it summarized the views of the 3,000 women who were with her as representatives of numerous organizations. Stepping forward in rapid succession, they presented their arguments succinctly and effectively, and if they were rather lacking in statistics, they made up for that by their fervor and by the realization that they were speaking for great bodies of women firmly united in opposition to any change in the Volstead act unless it were to make it more drastic.

Having yielded this day to the dry women, the wets took charge again. Father Ruggeone, a priest of the Pennsylvania antiprohibition union, and Mrs. Viola Ashurst, chief of prohibition officers in New York, told of the evil effects of the Volstead law as observed by them in their respective territories and the Moderation league of New York offered a huge mass of statistics and graphs. Then Lieut. Lincoln C. Andrews, chief dry enforcer, was recalled to the stand and under questioning admitted that in his opinion the enforcement of the liquor laws would be easier if beer of low alcoholic content were distributed under government supervision to bona fide applicants. He said the sale of such beer in saloons should not be permitted as it might serve as a "lead" to bootlegging of hard liquor. Having brought out a lot of information as to the vast number of stills that are being operated, Senator Lee continued:

"Now, I want to ask you, as a man and a citizen, what you think can be the manufacture of liquor in the volume as is necessary to put the American home into direct and intimate contact with liquor?"

"Of course it does," replied Andrews.

"Is not this," questioned Lee, "defeating millions of families and contact with the manufacture and distribution of liquor, this secret, intimate contact with the saloon—is not this utter destruction of the morals of the home in which this goes on?"

"Unquestionably, it is seriously injurious," admitted the general.

All of which caused Nation among the wets and all the dry leaders to say unpleasant things about Andrews, some even demanding his removal by the President.

With completion of the wets' case the board of temperance, prohibition and public morals of the Methodist Episcopal church resumed the presentation of testimony in behalf of the drys' contention that the Volstead act not only should not be weakened but should be made more rigid than it is at present.

In the senate Pence and Edge, wet leaders, prodded Borah until the Idaho senator indulged in an outburst that brought applause from the wet side of the chamber, despite the efforts of Vice President Dawes to maintain order. Borah denounced the proposals of the wets to modify the Volstead act as schemes to evade the Constitution and therefore reasonable and leading to anarchy, constitutional anarchy and the breakdown of constitutional government.

MUSSOLINI'S visit to Tripoli was watched with great interest. The premier was given a reception worthy of an emperor and his speeches there contained a suggest that the Italians form a new Roman empire, though he carefully refrained from intimating that any territory belonging to other countries is desired. Correspondents with his expedition seem to think no more land is needed as Libya's coastal plain is a valley 900 miles long and 200 miles wide, with more cultivable land than there is at present in all Italy. If property developed it will furnish an outlet for Italy's surplus population. The land is very cheap, now, and does not need irrigation. Besides it is the duty of the Italian government to realize fully the possibilities of this region.

FRANCE and Spain called the Riffians to a peace conference at Tanja and handed them an ultimatum. If their terms are not accepted they are ready to launch a combined offensive that probably will wipe out the rebels. These terms include the abdication and virtual exile of Abd-el-Krim and the disarmament of the tribes. The allies offer to restore the leaders of the tribesmen and to supply funds for the development of the country. Krim will be provided for suitably if he will leave.

FOR the second time Russia has modestly declared it will not participate in the preliminary disarmament conference called for May 18 in Geneva, and it will not be asked again. Reports in London are that the conference may be postponed or abandoned, the French move to this effect now having the support of Wales, Rumania and some other states on the Russian border.

France and Germany have concluded negotiations abrogating most of the clauses of the Versailles treaty restricting German aviation development and have signed an accord permitting commercial flying without discrimination over both countries.

LATEST reports from China were that the Nationalist troops of Marshal Chang had broken the lines of the national army commanded by Wang and were about to attack Peking itself. It seemed likely they would soon be in possession of the city. Marshal Wu Pei-fu, who has been invited by the national army leaders to take supreme command of the capital, had made no move to accept but was waiting with the army west of Nankow, ready to take advantage of the situation, whatever it might be.

LUTHER BURBANK, the world's most eminent horticulturist and a great benefactor of mankind, died at his California home and his body lies at the foot of a cedar of Lebanon in the grounds where he carried on many of his most notable experiments in the development of fruits, flowers and vegetables.

DOROTHY Hertz, a Williamson county, Illinois, miss in the home of the state records with after a reunion of the kin, perhaps of the curious. Six men were killed and many wounded before the governor gained control of the situation. Further trouble at election day was predicted.

Farmers Urged to Plant Sweet Sorgo

A wedding dress that was said to be the most evolved from those St. Alfred Room social here comments on fashion at Westminster Hall county court. A new local street sign was going to be worthy of the moment.

"Do grooms carried across your their dresses alone to the altar?" Sir Alfred asked a woman witness. "Yes, if they are slim," was the reply.

Solitaire

Life is a string of many colored beads:
Transparent glass ones,
Hard heavy agate,
Mixed and string together,
Growing with years
Dead by dead,
The lovely glass ones
Joy,
The agate
Sorrow,
Death comes—

Vision's Thorny Path

There is no short cut to correct training in wisdom. After all the centuries of invention he could not be brought the heavy slowness which must still be trodden in solitude, with bleeding feet and sore eyes and it was trodden by them of old time.—George Eliot.

Puzzle

PRIZES OF GAME OF MAP HUNTING

Sport Is Equal in Interest to Solving of Cross-Word Puzzles.

Washington.—Equal in interest to cross-word puzzles is the game of map hunting. The by-product of cross-word puzzles is an increased vocabulary. The by-product of map hunting is a vocabulary of words from a score or more of ancient and modern languages, and a fresh point of view of geography.

Problems may be selected from the news of the day or from the map itself. Right now Chinese armies are fighting for possession of Peking. The question is what does Peking mean to the Chinese?

Equidistant from Peking are places named Nanyuan and Peiyuan. The syllable "pe" or "pei" is a familiar one in Chinese names. So is "nan." Everyone will think of Nanking. Further inspection of the map shows that Peking bears the same relation to Nanking, as Nanyuan does to Peiyuan; that is, the "pe" is north and the "nan" is south. When we remember from history that Nanking was one of the favorite capitals of China, the puzzle is solved; Peking means the north capital and Nanking means the south capital.

The Puzzle of Three "D's."

"Not only Chinese words but Russian, Spanish, Arabic and words of many other languages also, may be learned as readily by exploring expeditions—on a map," says a bulletin from the National Geographic society's headquarters at Washington, D. C.

"As a grade school pupil in geography, everyone had to learn the major rivers of Europe. What satisfaction when Russia finally was reached, for there ran the rivers of the three D's; the Dniester Dnieper and the Don! They were easy. Yet the repetition of the 'D' should have aroused suspicion. An adult intellect can see that there is something wrong between the 'd' and the 'n' of the first two names.

"Throughout the desert regions of northeast Africa and into Arabia, the map explorer is confronted with the term 'Bir' before names indicating small places; Bir Garrab in Egypt. Bir Soluk in Cyrenaica, Bir-el-Melosah on the Damascus-Bagdad post route. 'Bir' makes one think of a famous Biblical name. Beersheba. In the desert a community exists either where there is running water to make a pool or a well to supply water by bucket. Running water is so rare in the desert that it is generally marked by a large community, an oasis, and therefore, 'bir' probably is Arabic for well.

"Indeed Beersheba confirms this. Sheba's wells were seven. They supply water to thirsty travelers today even as they did to Abraham and Sarah. In Beersheba Jacob robbed Esau of his birthright and to the crossroads of the 'birs' came Elijah fleeing from the original Jezebel. On the limestone walls of the wells are deep lines worn by thousands upon thousands of ropes, a mute history of the venerable place.

"Before leaving this section of the map one should learn easily that a 'wady' is a stream bed, dry most of the year. Another Arabic word which now frequently pops into the daily news is 'Jebel.' The Jebel or Gebal Druses who are troubling the French Syria are the 'Mountain' Druses. Jebel marks many mountain ranges in Africa and 'Jeb' appears beside single peaks. At the other end of the Mediterranean is Gebal-al-Tarik—now Gibraltar.

"Your seasoned map explorer never trusts spelling. He trusts sounds far more. He will 'hear' a similarity between 'wady' and the first syllable of Guadalquiver. The 'wady-al-Kebir,' the great river, is just as much a memorial to the Arabic invasion of Spain as the halls of Granada. Guadalajara, in Mexico, is an Arabic 'wady' name that shipped to the New World on a Spanish conquistador's galleon.

The "Great Great River."

"One of the favorite lessons of the geography classroom is that Yangtze Kiang river is a gross error. Since 'kiang' means 'great river,' the poor Chinaman struggling with English would be a trifle confused to hear an American say what would sound to his ears 'Yangtze great river river.' The same precautions must be taken with 'ho' meaning a river not so great, like the Howang Ho.

"A similar situation is suspected in India when one discovers numerous 'gangas' as labels for streams in Ceylon. Ganges is not far different from 'ganga' and both mean river, so Ganges rightfully should stand alone like the 'Don' of Russia and the 'Avon' in England. Avon is an old Celt word for river.

"To the map hunter duplication of syllables is a hint to some common geographic fact. He will discover that the 'pore' of Singapore and the 'pur' of Bhagalpur, India, both mean city. In China he will find the provinces of Kiang Si, Shan Si and Kwang Si. It is apparent that the provinces are far interior. Since the main population is on the coast, the Chinese must have referred to that tier of provinces as the West, much as Americans do the west coast. Investigation proves out another map puzzle, for 'si' is Chinese for 'west.'"

The new construction of levees and supplementing of the individual protective work in Island district in Kings county, undertaken by the Clarks Fork Reclamation district, has been suspended for the season. This work has been carried on by the officers of the new district organized last year with an issue of bonds in the sum of $31,000 for reclamation purposes.

The greatest single reforestation project in the San Bernardino National forest, the planting of 3000 western yellow pines, has just been completed on the crest south of Lake Arrowhead.

Leads Woman's Rights Movement in Japan

Mme. Miyagawa, leader of the women's rights movement in Japan, who is to represent her nation in the women's rights congress which is to be held in Paris this summer.

Heartbeats of Five Are Broadcast by Wireless

Minneapolis.—Persons hundreds of miles distant heard the heartbeats of five men broadcast here from radio station WCCO.

A combination stethoscope and amplifier was rigged to the microphone by physicists of the University of Minnesota to reproduce the sounds of the heart. Reports from points throughout the Northwest indicated the success of the experiment.

The sound was compared to that of a pump by many listeners. The difference in sound caused by the opening and closing of the heart valves was said to be discernible.

Less Reading in Italy Than Any Other Land

Rome.—Italians read less than the citizens of the other great nations of the world, it has been found by a committee of distinguished scholars, attempting to create interest in the work of young Italian authors.

Rome, with a population of nearly 900,000, has hardly a dozen important bookshops and these are largely devoted to the classics, technical and political books.

Cupid in Trouble

London.—Cupid is having troubles because of hunting accidents. Three weddings have been postponed recently because the parties had been badly hurt by falling off their horses.

Freak Formation of Trees Not Uncommon

If anyone doubts that Nature has a sense of humor, he had better turn his attention to trees, and see what queer things she invents at times.

Evidently the long neck of the giraffe struck her as a joke that would bear repeating, for she has copied it almost to perfection in Key West, Fla. There, in what is known as Maloney's garden, is to be seen the giraffe tree, a date palm grafted onto a fig tree.

The graft has taken place about five feet from the ground, and in order to support it the fig tree has flung several roots across and around it. The date palm has curved downwards and upwards until it presents a faithful copy of a giraffe's neck, at the top of which shoot out the orthodox leaves, mingling on its left with those of the fig tree.

The Siamese twins offered Nature a chance too good to be lost, and she has reproduced them many a time in the tree family. There was a tree of this kind at Paignton, in Devon, England, and in the United States there are two splendid specimens.

At Sterling, in Massachusetts, two great oaks are solidly joined by a tranversal branch or trunk a yard long and as thick as a man's body; while in New York state there are two ash trees joined by a thick branch which unites their trunks (distant one from the other more than 20 feet) at a considerable height from the ground.

Some years ago Nature discovered a disused quartz-mine chimney in Siam. Very soon a green branch was seen peering out of the top of the chimney, and it rapidly became a bouquet of greenery. The whole thing looked like an immense flower vase, but it is more than likely that by this time the roots inside the chimney have burst the brickwork, and that the "vase" has crumbled away.

Famous "Newspaper Row"

A part of the site chosen for the new National Press building was known as Washington's Newspaper row in Civil war days. G. A. Townsend is authority for the statement that newspaper correspondents had pitched upon this block before a hotel was projected. Its central location, proximity to government buildings, telegraph offices and lines of communication made it ideal. This line of offices was known the country over as Newspaper row and when the dwellings were converted into hotel property the correspondents continued to occupy the offices. When the Ebbitt house was rebuilt the proprietor reserved the basement stage for newspaper men's quarters. The building which is to be erected on this historic spot will become the permanent home of the Washington bureaus of many of the leading newspapers of the country, as well as of the National Press club.

Proving that they certainly believe in planning ahead, Sacramento Chamber of Commerce leaders announced that they hope to hold a world's fair here in 1949, the hundredth anniversary of the discovery of gold in California. This will be led up to, they indicated, by a repetition of the city's famous "Days of '49" celebration every decade. The next celebration will be held in 1929 and followed by another in 1939 and the world's fair ten years later, they said.

REVIEWS SCHOOL GAINS IN 25 YEARS

Specialist Cites Advances in Vocational and Scientific Fields.

Washington.—James. F. Abel, assistant specialist in foreign education systems of the United States bureau of education, in reviewing the advances made on education in the last quarter of a century, calls attention to the changes brought about by the war resulting in new countries and marked changes in others. He says some of the new constitutions contain virtual educational bills of rights.

It is declared that reforms affecting entire systems of schools were attempted and carried out with more or less success by several of the large nations. The scope of education was almost doubled in breadth by the further inclusion of scientific and vocational training, a training for citizenship and services and its adoption by a number of countries as a matter of national promotion and support. Better care for the physical welfare of mankind through teaching children essential health habits, arranging games and athletics for all rather than a few, erecting finer school buildings to furnish good and pure air and insisting on medical inspection as a directive more than a defensive activity had their practical beginnings.

It is pointed out that on the continent of Europe alone twelve nations adopted new constitutions in the four-and-one-half year period between July, 1918, and December, 1922. "Nine of these were new nations whose people had long been subjected to a kind of denationalization through having their racial customs and traditions ignored," says Mr. Abel, "their religion suppressed and their native tongues more or less outlawed.

Gains in Colonies.

"They wrote into their constitutions a recognition of the right of national minorities to education in the mother tongue and to the development of their own racial literature and culture. Other clauses in another of the new constitutions amount to a veritable educational bill of rights. A uniform school system for all children, with special privileges for no social class, variations being permitted only for different vocational and local interests, is the common ideal.

"Colonial policies in education and their results have stood out in bold relief in this first quarter of the Twentieth century. As a part of the responsibilities which they assumed in consequence of the Spanish-American war, the United States set about the education of their new citizenry and rapidly developed in the Philippines and Porto Rico systems similar in plan to those in the continental states. In the Philippines they undertook to provide some 12,000,000 of people with a common language and through it a training that would mold those people into a self-reliant, self-dependent body. Philippine schools from kindergarten to university grade now enroll more than one and one-quarter millions of students and are maintained at a yearly cost of more than 23,000,000 pesos.

"In Porto Rico the government of the United States found a population at least 80 per cent illiterate, no public school buildings, elementary education provided for less than one-fifth of the school children and no instruction on the island in advanced grades or of quality sufficient to prepare a student for admission to a good college. Out of that situation a complete educational system has been wrought, reaching approximately one-fourth of a million students and costing annually about $4,000,000. Vastly more has been accomplished in 25 years in these two insular areas than was brought about in several centuries under a government neglectful of the place of education in wise colonial policies.

"Directors of education follow closely or accompany the governors general sent out to the colonies by the government of the British empire. Autonomous universities have grown apace in numbers and wealth throughout most of its dominions in recent years. Cambridge and Oxford local examinations are held in many of the colonies as a way of opening to colonials attendance at British universities.

New Organizations Start.

"Engaging in and bringing to an end great military conflicts necessarily created new international contacts. These carried over into education and gave added impetus and force to generous policies such as were initiated by Cecil Rhodes. Considerably more than a hundred private organizations sprang up, most of them in the past decade, and they are carrying out their purposes in the promotion of one or another phase of education in international relationships. Several of these were world associations claiming no less than all nations and all peoples as their field for further mutual understanding of and progress in education. International exchange of students, teachers and research workers in the spirit that science and learning know no political boundaries was established and is growing rapidly.

"The educational revival in Mexico was concerned with improving existing schools and establishing new ones, encouraging industrial and technical education, providing more libraries and books, gathering and conservating the historic and artistic material of the country, aiding poor children and reducing illiteracy. The ministry of public instruction was recreated and reorganized and budgets far in excess of those for previous years were proposed and expended.

"The program of federal participation in and partial direction of vocational education begun in the United States in 1918 now affects some 6,000 schools and more than half a million young people and involves an annual expenditure of approximately $20,000,000.

"The United States began the century with approximately 720,000 pupils in 8,000 public and private secondary schools. For years new schools were opened at a rate equal to at least one each calendar day. More than 16,500 of them now enroll 3,250,000 students and are training 23 per 1,000 of population in secondary subjects as against 9.5 in 1900."

Find Vaudeville Uses for New-Made Gases

London.—Helium gas, estimated by Sir Ernest Rutherford to have lain imprisoned in a radio-active mineral for a period of 500,000,000 years, was liberated at the Royal institution recently, and made to manifest its existence by the passage through it of an electric discharge. The experiment concluded the first of four lectures which Sir Ernest Rutherford is delivering on the rare gases of the atmosphere. The rare gases, he said, were characterized by the absence of chemical properties; all were chemically inert, though under certain special conditions they could be induced to form compounds.

With them must now be included the radio-active gases known as radon, thoron and actinon, which might be considered as isotopes of xenon. It was only 30 years since Lord Rayleigh had described argon, having prepared minute quantities of the gas measured in cubic centimeters. At that time it was a matter of great difficulty to produce as much as a liter of the gas, but now it was manufactured on an enormous scale.

Neon, too, had found industrial application for such purposes as illuminated street signs, while helium, which is used for filling airships, was first prepared from clevite, and was now mainly derived from natural gases found in Canada and the United States.

Churches Claim Gain of 800,000 in 1925

New York.—The number of members and communicants of churches in America increased 800,000 during 1925, according to the annual census of the Christian Herald, made public recently. The grand total at the end of the year was 46,883,756. The Methodists led the increases, taking the place usually held by the Roman churches.

The census shows an increase of 166 church buildings. The total at the end of the year was 236,964. The number of ministers increased 2,966, bringing the total to 216,078.

The increase in communicants or members shown by the Methodist group was 220,183. The Western Catholic bodies were second with an increase of 203,990. This figure, the smallest in several years, was explained as due to restriction of immigration from Catholic countries. The Catholic bodies still lead in number of communicants by almost double the largest other church, the Methodist. The census totals are:

Western Catholic, 16,156,914; Methodist, 8,920,190.

The Baptists are third with an increase of 104,396, giving them a total of 8,397,914. The Disciples of Christ showed the next largest gain, 90,493, as compared with 61,520 for the Presbyterians and 42,485 for the Lutherans.

3 in Every 10 Brooklyn Women Work for Living

Brooklyn, N. Y.—Three of every ten women and girls more than fourteen years old in Brooklyn are engaged in remunerative occupations, according to figures released by the chamber of commerce from a compilation of the United States census.

What's more, one in every four persons working for wages is a woman. The total number of women employed in this borough is 215,139. Employment of women extends into virtually every field, the figures show.

This borough has a full-fledged woman paperhanger, two boatwomen, a salloress, two female cemetery keepers, three railroad switchwomen and flagwomen, 25 farm "laborettes" and 97 who gave their occupations as longshoremen and stevedores.

There also are female piano tuners, hunters, trappers and guides. Draymen, expressmen and teamsters total 59, and painters, glaziers and varnishers, 85.

"Air Bumpitis" New Flyers' Affliction

Cheyenne, Wyo.—Traveling across the continent in a mail airplane is not as comfortable as riding the "soft cushions" of a railroad car, several pilots of the air mail service have learned.

A new malady has visited the pilots who traverse the Rocky mountains in daily flights—"air bumpitis." Its effects are bruises and sprains of the back and often the limbs.

Recently two pilots, after flying through a heavy wind and "rough weather" over the continental divide, were obliged to go to bed for a rest. The bumps, produced by air currents from dissimilar terrain, probably are worse over the Rocky mountains than in any other section of the transcontinental mail route.

State Real Estate Commissioner J. R. Gabbert, recently appointed G. J. Allison of Stockon as a special deputy to check up on real estate brokers. Allison is one of four deputies who will make inspections to see if real estate brokers are observing the state law.

Better Babies

New York.—Bigger and better babies are being raised in Germany on meat extracts instead of milk, Dr. Samuel Gross, back from Berlin, relates. Such feeding begins as early as the age of six months.

F. W. Whitehead, field veterinarian of the State Division of Animal Industry, is conducting a tuberculin test of dairy herds on the ranches near Cazadero, Sonoma county.

A petition is being circulated in Lodi, asking the city trustees to submit the proposal to buy the Bank of Lodi building for a city hall at a special election.

A total of $4,000,000 is involved in two hotel projects for Santa Monica and work on one of them, costing $2,000,000, is to be started immediately.

MYSTERY OF SLEEP SOLVED IN PART BY PSYCHIATRIST

Special Electrodes and Galvanometer Enable Doctor Richter to Test Depth of Unconsciousness.

Baltimore, Md.—A definite step in unraveling the mystery of sleep, which has baffled scientists from earliest times, has been made by Dr. Curt P. Richter of the Henry Phipps Psychiatric clinic of Johns Hopkins university. With a string galvanometer and specially constructed electrodes he has been able to tell how soundly a person is sleeping without awakening him.

His experiments not only have shown that sleep is of two distinctly different kinds, but that there is a great difference between real sleep and conditions in which certain types of mentally ill people appear to be asleep.

His discoveries are reported in a paper entitled "The Significance of Changes in the Electrical Resistance of the Body During Sleep," which appears in the proceedings of the National Academy of Sciences.

His research showed that the resistance to an imperceptible electrical current sent from hand to hand during sleep was localized almost entirely in the skin. This resistance increased in one instance from 50,000 ohms when the subject was awake to 500,000 ohms when asleep.

The current was applied by two electrodes of zinc covered with a thick kaolin paste mixed with saturated zinc sulphate solution. These were attached to the hands and connected to the string galvanometer, designed to measure the smallest currents.

The experiments showed that the intensity of the resistance varied directly with the intensity of sleep. It was discovered, however, that when sleep was not sound the resistance of the skin on the backs of the hands usually decreased. In these cases the subject was not refreshed by sleep.

In the case of patients suffering from catatonic stupors, which so closely resemble sleep that it is impossible to tell by looking at the patient that he is not asleep, a very different condition was found. In these cases it was discovered that the palm-to-palm resistance of the hand was less than normal, indicating an intense consciousness; while the resistance from back to back of the hand was very high, indicating complete muscular relaxation and lack of control.

From these studies it is hoped that new light will be thrown upon nervous conditions, not only of mentally ill patients but of relatively normal people suffering from nervous strain.

How Scientists Learned Secrets of the Plants

To discover how flowers feed—starve them; if you would learn why most plants grow upwards—pin them along the ground.

These are among the experiments conducted by students in the recently opened Sargant Laboratory for Plant Physiology. They study plants as living organisms, and become acquainted with the problems and dangers that beset the life of the commonest dandelion.

How plants breathe, how their food is obtained, and how they respond to imposed conditions are questions that can be answered only by experiments. The effect of supplying and withholding various "foods" is investigated; the rates at which the various plant organisms grow are measured under different conditions; so, too, is the rate of breathing.

Certain plants that require light for normal growth are placed in complete darkness, while others are bathed in light from colored arcs. Water supplies are varied and temperatures regulated. A geranium that has a curved stem is subjected to electrical treatment and made to incline a different way. In its struggles to resume its normal growth it reveals its various organs and their functions.

The Sargant laboratory is set in a small but well-stocked garden where plants are reared for experiments under almost perfect conditions.—London Mail.

How Long Fishes Live

How long does a fish live? Not out out of water. Any boy can tell that from observation. But with proper food—everything it needs?

According to Popular Science Monthly, Major F. S. Fowler of England, who has been conducting a special study to find out, reports that a catfish, with which he is acquainted, is now fifty years old and is still lively. An electric eel in the London zoo, he found, lived 12 years. Other fish age figures, as given by Major Fowler, are as follows: Carp, thirteen years; goldfish, twelve years; herring, four years; salmon, three years; brown trout, six years. A bullfrog's recorded age was fifteen years; toad, eleven years, and the giant salamander, fifty-two years.

How to Pack China

Line your packing case with a good layer of straw, sprinkle it well with water before putting in each article filled and wrapped in soft paper and wound round with straw, and put a good layer of well-sprinkled straw between each layer of glass or china.

The water makes the straw expand so that each article is firmly wedged in place.

For special treasures small carboard or wooden boxes may be provided, into which they are tightly packed before being embedded in water-sprinkled straw.

How to Soften Fur Rug

If a fur rug has stiffened after being washed, it can be softened by applying the following mixture to the wrong side of the rug: Three tablespoonfuls of castor oil, one of glycerin and one of turpentine. This must remain on for a week, when the rug, still on the wrong side, should be well rubbed with a smooth stone or block of wood.

Golden State
News of Interest to All

Dunsmuir's new city hall was dedicated recently at a public program.

There are 1614 members of the faculty of the University of California.

Electors and patrons of the Riverdale Grammar School district attended

With twenty-five charter members, a Kiwanis club has been formed at Kingsburg, Fresno county.

Organization of the Hayfork, Trinity County Chamber of Commerce has been perfected.

Approximately $50,000 will have to be spent by the city of Chico for a sewage disposal plant in the near future.

California Library association, fourth district, will hold its annual convention in Bakersfield Friday, May 14th.

Experiments in rice production are to be conducted in the Shafter district, Kern county, on the James E. Haag ranch.

Dedication of the recently completed temple of Roseville Lodge No. 222, Free and Accepted Masons, will be held on May 1.

Plans are being made for the annual community fair to be held this year at Galt, Sacramento county, on August 27th and 28th.

Mrs. Anna E. O'Neil, Redding, probably the oldest woman in Shasta county, died in the home of her niece, at the age of almost 96 years.

What the trout fisherman wants and what is best for the trout was learned by the study committee of the California Development association at a meeting a short time ago.

Seventy-five years and several months of age, the city of Marysville will, on the Fourth of July next, celebrate its diamond jubilee anniversary as part of the Independence day festivities.

More than a quarter of the entire state's ripe olive pack will be put up this season at the Lindsay Ripe Olive company plant in Lindsay, it is estimated by W. O. Johnson, manager of the plant.

Bean growers of Ventura county are preparing their ground for planting. The growers at Ventura are famous throughout the world for their skill in fitting the ground for bean seeding.

The State Motor Vehicle Department announced revocation of the licenses of thirty California motorists during the last month, bringing the total of revocations since January 1 to ninety-three.

Landowners in the Thermalito Irrigation district, Butte county, approved at the polls a $50,000 bond issue for the completion of the irrigation distributing system and purchase of rights-of-way in the district.

Air mail service between Los Angeles and Salt Lake was inaugurated recently with the departure of pilot Naury Graham of the Western Air Mail Express for the Utah city with 100 pounds of miscellaneous mail.

California investors were recently warned by State Corporation Commissioner Edwin M. Daugherty to beware of out-of-state mining and oil promotors, which are flooding the mails, he said, with circulars offering stock for sale.

Maxwell, Colusa county, may have a new postoffice building in the near future, according to the announcement of Postmaster A. J. Fouch, who has submitted plans for the structure to the Postoffice Department at Washington.

A $100,000 two-story, Spanish-type stage depot and hotel to serve as the Anaheim terminus at Anaheim, Orange county, of the recently consolidated Pickwick and Motor Transit stage systems will be constructed in the near future.

A ranch containing 20 acres, located on the Bloomfield-Petaluma road, Sonoma county, and stocked with poultry and stock valued at $9,990, consisted of the estate of Charles M. Jones, according to an inventory filed in the superior court.

Bids for the $45,000 memorial to be erected at Gridley, Butte county, to the memory of the soldiers who lost their lives in the world war will be opened by the board of supervisors on May 7. A plan for the building already has been approved.

A site has been purchased and plans are being rushed to build one of the most modernly equipped hospitals in the San Joaquin valley in the city of Exeter, Tulare county. Bids are expected to be called soon on this building, costing about $40,000.

Subject to deductions or additions for alternates stipulated in the bid, the city council of Marysville, Yuba county, after spending two hours over the figures submitted by five bidders, awarded the contract for the construction of the municipal natatorium.

An unjust burden is imposed on the building industry by the series of fees levied by the city of Stockton, is the declaration of the Builders' Exchange of Stockton, Inc., which will make an effort to lighten the load. Edward Grogan, chairman, points out the various taxes as follows: Every contractor, builder and supply man pays a municipal tax; when a building is to be erected there is a permit fee; the general contractor is taxed and all sub-contractors are taxed; there is an inspection fee; plumbing inspection fee and an electrical inspection fee.

A San Franciscan recently claimed the spaghetti-eating championship of the west and every town has its pie-eating competition on festival occasions, but Isleton, Sacramento county, is offering something new in the way of food consumption tests. The city fathers have offered a prize for the person who can eat the most asparagus, the favorite food and principal product of that district. Asparagus eaters have been invited to assemble for the championship bout at the second annual California Asparagus Festival, May 15 and 16.

The report of the State Fish Exchange indicates that nearly 2000 licenses will be issued to brokers and dealers in fish throughout California in 1926. Renewed activity in the regulation of the fish industry under the Fish Exchange Act has resulted in a considerable increase in the business of the exchange since Secretary B. B. Florence took office in November, 1925.

Mrs. Adelaide Janssen, of Sebastopol, known among the members of the Sebastopol Rebekah Lodge as "Grandma" Janssen, was given a Past Noble Grand pin in honor of her seventy-ninth birthday by the lodge. Mrs. Janssen is one of the oldest members of the Sebastopol lodge and one of the most active.

The contract for the new State Bank of Dunsmuir building was signed recently. The contractor agrees to have the building completed by October 1st, starting work on the foundation May 1st. The building will cost about $40,000 and will be a modern banking house.

Construction contracts, calling for the outlay of approximately 800,000 have been called for by the Nevada Irrigation district at Grass valley, Nevada county, on specifications prepared by the State engineering department and approved by the board of directors.

a mass meeting in the high school building at Riverdale, Fresno county, recently, for the purpose of voicing their views on the selection of a site for the proposed new grammar school building. The call for the meeting was at the instance of the school board.

The BULL'S EYE

Editor and General Manager WILL ROGERS

Another "Bull" Durham advertisement by Will Rogers, Ziegfeld Follies and screen star, and leading American humorist. More coming. Watch for them.

Congress

No. 2

Statistics have proven that only one-half of one per cent of the speeches made in Congress are listened to. A great many Congressmen speak IN, but not TO, Congress. But every speech is published in the record. They send the records back home to show "What they told 'em up there in Washington." Now the people back home think Congress heard their "Lem" tell 'em this.

Now, here is my scheme to stop speech making. A Bill reading as follows: "Congressional Record must not only contain speech, but number of members, and names who listened to speech, *and why.*" For instance: "Congressman Post Hole arose to a point of information and spoke at length on, 'Is Locarno a town, or is it a Treaty?' Length of speech, without waiting for applause, four hours, thirty-six minutes; attendance, Gout (Rep. N. Y.): 'Unable to get out.' Sixty-forty (Dem. N. J.): 'Case of reciprocity, he listened to mine.' Lowbrow (Rep. Mass.): 'I was asleep, even the good speakers haven't woke me up.'"

Now I claim that will stop *some* speech making. The minute it gets back home that "Lemmie" is talking to himself up there, "Lemmie" will stop talking.

You know why they won't listen to anybody up there? They have gone out to smoke, that's why, and you know why they've gone out to smoke? Why, "Bull" Durham, of course. IT'S BETTER THAN ANY SPEECH EVER MADE.

Will Rogers

P.S. There will be another piece in this paper soon. Look for it.

SAMUEL M. SHORTRIDGE

ONE thing the voters of this section say when politics are mentioned, is: "Well, Sam Shortridge can count on my vote for re-election." That's how his neighbors feel about the matter.

There has never been any doubt about Senator Shortridge's stand on any proposition. He has never straddled. He has never dodged a roll call. He has been present at all of the meetings of the senate. He is absolutely dependable.

The senator's stand in the Colorado River legislation will win him much support in the south.

We also note that Senator Shortridge has put through legislation concerning pension matters. This may be considered small stuff by some but it shows the character of Samuel M. Shortridge. He is so human that he can keep in touch with the petty things of life and at the same time do a man's work, a man's thinking and a man's voting on the big problems that confront our government.

We could write columns in praise of our neighbor who graces the upper house in the United States Congress, but with his other friends here we simply say: "We're for Senator Sam Shortridge from now until after the second of next November and from then on."

FIRE PREVENTION, EVERYBODY'S BUSINESS

WITH the advent of spring and summer weather the exodus of the campers from the cities has begun, and already the highway is thronged over the week-ends with cars of every style and vintage ladened with the tents and blankets of campers. This has caused the state and federal forestry departments to issue warnings to campers concerning fires.

Every year vast sums are spent by both the state and the nation for the prevention of fires and for fighting fires that do start. Yet this money will not save the forests unless each individual does his part in preventing fires in the forests. If each camper would be individually responsible for the extinguishing of every fire which he lights, loss to the United States would be cut by millions of dollars. Drastic penalties will be inflicted for every detected violation of the fire laws, but this will not be sufficient. What is needed is an awakened public understanding of what loss by forest fire means to this country, and an individual interest in reducing this loss to a minimum.

—o—o—o—

EUROPE CAN LEARN FROM AMERICA

THE United States of America is a visible demonstration that 48 separate and distinct local governments, handling local problems and local conditions, can function successfully under one strong guiding hand, on matters pertaining to the national or international welfare of the 48 separate units.

Hatred, jealousy, envy, greed or the desire to acquire territory from a neighboring state, does not exist in the United States. The American people play politics through their different parties and they play it hard, but when their interests clash, they have learned to leave the settlement of their difficulties to their courts or to their federal government.

As our nation has successfully solved the problem of combining 48 separte and distinct state governments under one national head, in handling affairs for the well-being of the nation collectively, why will it not be possible ultimately for European nations to pattern after our example? The problem of harmonizing the affairs of many different races is more complicated, but basically the problem is no different than was the harmonizing of the many questions pertaining to states' rights, under our own central form of government. Our own 48 separate states, the provinces of Canada and the central governments of Canada and the United States live side by side, and no thought of war or conquest, jealousy or hatred exists between people of these nations or their separate states.

Europe and the rest of the world have an example to pattern after, if they so desire. The fact that their problems are more intricate and difficult at the present time, should make them more determined than ever to group themselves under some central or controlling organization with the power to harmonize and settle local grievances as they arise, just as do the local and central governments of their neighbors in America.

In the organization of the Walter Hines Page School of International Relations at John Hopkins University, Baltimore, the United States is again showing the world the way in which to eliminate war, and solve its problems. This school will not teach jealousies and hatreds, but its students will ascertain the facts relating to international affairs. When the people of different countries know the facts, when they are not kept in the dark on international problems, when diplomats and officials can no longer withhold information, and when the whole situation regarding international controversies can be broadcast without threats of war, because an informed public consciousness will not permit the jealousies, greed or hatred of a few individuals to plunge millions of people into armed international conflict.

BOYS' WEEK

AGAIN we come to Boys' Week, which brings to mind that well-worn but amply justified remark that the boy of today is the man of tomorrow. What the man of tomorrow will be depends very much on the outlook he is given today by the men of today. Throughout the nation an observance of boys' week has been asked for the week just past, and in most of the cities programs have been staged in observance of the occasion.

The boy is coming more and more to demand the attention of a thinking public. Changing conditions have produced changed problems. The growth of the cities has done away with the old swimmin' hole, and the old vacant lot, where the 'gang' used to congregate to play ball is now the site of an apartment house. These changes have necessitated other changes. These are institutions in a boy's life and must be compensated for. Therefore we have today a greater need for the athletic field and the swimming pool.

In other lines the change has been as marked. The complexities of modern civiliation demand of the boy who is to take his place in the world a greater understanding of things and events than was required of his grandfather. This understanding can be best imparted by the comradeship and interest of older men. This is what is asked of us; more interest in the boy and his problems, whether our boy or the boy who sells papers on the street corner. Each boy is a potential leader of world events. Every great man has at some period of his life been a boy, and what he became very likely was influenced by the environment and conditions which surrounded him during the formative years of his life.

So we of today are confronted with the problem of creating an environment for the boys of today which will make them better men tomorrow, and of sowing in them the seeds of better citizenship and better manhood.

SAN CARLOS

One of the jolliest affairs of the season was the Old Clothes Party and whist game given under the auspices of the San Carlos Community Club at the San Carlos School House on last Saturday evening. Ten tables of whist were enjoyed by a group of happy card players, who played whist in one of the class rooms. Attartcive prizes were awarded to Mrs. Edward J. Wheeler and Norman H. Martin. A group of merrymakers appeared in quaint and old-fashioned garments. During the grand march everyone in costume was given a pride for their efforts, and attractive make-up. Dancing lasted until 12 o'clock.

Mr. and Mrs. Jay Allen and son of San Mateo were visitors at the home of Mr. and Mrs. Roy Allen on Friday.

TRUSTEES MEET

The matter of providing a tax for trucks and other heavy conveyances entering and using the streets of San Caros was considered Monday night by the board of trustees at their regular meeting. This matter, along with a new ordinance, lowering the speed limit was placed in the hands of A. J. Stebenne for action.

Bids of the proposed improvement of Laurel street were opened and the three bids placed in the hands of City Engineer Kneese and City Engineer Stebenne. The bids will be held under consideration until May 10th, when the contract will be awarded.

A house on Cypress and Chestnut streets was condemned as unhabitable and as a fire hazzard and was ordered torn down.

John V. Clark was appointed acting building inspector until such time as his work will warrant the hiring of an assistant.

Dr. Rosalie de la Hauterie, physician of San Francisco, has moved into the former Hartwell residence.

The home section of the P. T. A. met at the home of Mrs. J. W. Davis on Wednesday. Reading from the book, "The Child, Its Nature and Its Needs," by Mrs. Robert L. Simpson and various discussions on child welfare were the topics of the afternoon. During this program members sewed on fancy articles which will be used by them for card prizes. Those who attended this affair included Mesdames D. L. Stewart, J. M. Edling, Harry Mahany, A. Hindman, Edward J. Wheeler, Robert L. Simpson, O. D. Fairfield, Roy W. Allen, Walter Deveseaux, Nels eJssen, W. C. Johnson, William Grover, L. P. Hopkins, J. E. Baughn and Mrs. Frances A. Smith. Delightful refreshments were served by the hostess, assisted by Mary Elizabeth Davis and Mary Garwood.

Miss Erna Richter entertained over the week end at her home on Walnut street, Miss Alma Posler and Miss Marie Pasini, both of San Francisco.

Mrs. E. W. Roemer of San Francisco was a visitor at the home of Mr. and Mrs. J. M. Edling over the week end.

Rube Hurlbut, son of R. Hurlbut has engaged in the sign writing business in San Carlos. He formerly resided in Sonora.

Mr. and Mrs. E. Richter entertained on Sunday as their guests, Mr. and Mrs. Diets, Miss L. Diets and Mr. Arthur Pape, Miss E. Shaw and Mr. and Mrs

PENINSULA REALTORS HOLD BIG JOINT MEETING HERE

Representatives from practically every city of the peninsula and other cities in the bay region met Tuesday evening at the realty board session held at the Redwood City hall. F. T. Letchfield, industrial director of the San Francisco Chamber of Commerce was the principal speaker of the evening and spoke on the vast possibilities which are offered to this section in the way of harbor development and industrial growth. A brilliant future awaits the peninsula according to the talented speaker.

The meeting Tuesday evening was precided over by Henry Witte, president of the Redwood City Realty Board, Elmore B. Hinman, president of the Redwood City Chamber of Commerce, was introduced as the chairman and gave a short address as did also Mayor Henry Beeger of this city.

Stephen McAvoy.

Mr. and Mrs. A. E. Gibbons of San Francisco were dinner guests at the home of Mr. and Mrs. A. Dennery on Sunday.

SHERIFF M'GOVERN ANNOUNCES HIS CANDIDACY

SHERIFF T. C. M'GOVERN

Sheriff T. C. McGovern this week announces his candidacy to succeed himself as Sheriff of San Mateo county.

Sheriff McGovern is a product of San Mateo county. He was born and raised in the county. His father was one of the early pioneers, having come to San Mateo county in 1857 and resided here continuously until his death in 1922.

Sheriff McGovern served as a deputy under Sheriff R. S. Chatham. He served as a deputy in the recorder's office for five years. He thereafter served as a deputy under Sheriff Sheehan for five years. He later became Undersheriff under the late H. W. Lampkin and served in that capacity for one year, and at the untimely death of Sheriff Lampkin, he appointed by the board of supervisors to fill the unexpired term of Sheriff Lampkin.

Some of the incorporated cities of the county have twic as many deputies as has the sheriff's office. It is generally conceded, however, that in spite of the need of more help, the rapid growth of the county and the close proximity to large centers of population, that the sheriff has made good.

McGovern has been recognized as absolutely honest. He has been active and efficient. He has had a constant co-operation of the police departments of San Francisco and the surrounding cities.

Sheriff McGovern makes no idle promises. He offers to carry on in the same active honest and efficient manner in which he has worked during the past four years.

TENNIS CLUB COMPLETES FIRST TOURNAMENT ROUND

Last Sunday morning on the Sequoia Union High School tennis courts, the El Camino Club completed the first round of its tournament with the following results:

Girls' Singles

Inez Jamieson defeated Verda Seely 6-2; 6-1 and Ruth Adams defeated Ollie Thompson 7-5; 6-1.

Men's Singles

George Seeley defeated Anthony Heller 6-0; 6-1.

Mixed Doubles

Ruth Adams and Gordon de Holmes defeated Helen and Melvin Barton 6-1; 6-1.

Martha Thompson and Anthony Heller defeated Helen and Richard Savage 6-3; 6-3.

Margaret Peters and Stanley Mayer defeated Bertha Lothrop and Owen ompton 6-2; 7-5.

The El Camino Club has been recently organized by a group of tennis fans of this city and Miss Inez Jamieson is the president. There are sixteen members and all are very interested in the welfare of the club and hope to see it plan in inter-club competition. The present tournament will be finished in three more Sundays, the second round will be started and keen competition is expected.

STAMP COLLECTORS HOLD MEETING

Close to wtenty-five boys, girls and adults were out to the meeting of those interested in the hobby of samp collecting on Tuesday at the Intermediate School. Much enthusiasm was shown over the prospects of having a stamp club. Roy A. Hohberger, the San Mateo County Boys' Work Secretary, who lives here in Redwood, gave a talk on the values to be gained from stamp collecting when one is connected with a club where there is an opportunity of having friendships with others following the same hobby. Temporary officers were elected to serve until the end of the school year as follows: Terry Kellogg, president; Jack Willard, vice-president; James Dennis, treasurer; Arthur Walsh, secretary.

Further organiaztion will be completed at the next meeting which it was decided should be open to all parents who desired to attend and all others who were interested. The next meting will be held at the high school at 7:00 p. m. on Wednesday of next week. Further information can be secured by calling Redwood 1155-W.

HISTORIC TREE FALLS BEFORE AX

The old Paulson property that was recently sold to a San Mateo capitalist is being prepared for subdivision. It has a frontage on the highway and also on the Woodside road. The trees have been cut down. The wide spreading live oak on the Woodside road that has stood for ages giving shelter to the traveler in days gone by was not spared. It went to the slaughter. It was an unusually large tree, a sentinel in the forest of trees that surrounded it many years ago. In the sixties and early seventies the ox teams coming from the mills at Searsville would find rest and comfort under its cooling shade during the summer months. The drivers would rest here after the long journey with heavy loads of lumber from the mountains and feed the oxen before proceeding to the wharf here. The men on looking after the wants of the cattle would proceed across the road to Larkin's saloon to slake their thirst and enjoy a snack, while the oxen rested. Later they would unload the lumber at Hanson's wharf. In those days the Woodside road ran through the Paulson property and close to the big live oak that it now no more, it having become a victim of the woodman's ax for the sake of commercialism.

CAPTAIN WALLACE CELEBRATES HIS 80TH BIRTHDAY

Captain Wallace, who lives on Roosevelt avenue celebrated his 80th birthday recently. The Shipping Register gave a full account of the affair as follows:

Captain George Wallace, retired San Francisco shipmaster and bar pilot made his eightieth annual entry in the log of life this week, feted by a large crew of friends. Captain Wallace received the congratulations of his admirers at a reception tendered in his honor at the home of his son, Captain John Wallace, present port admiral of the Golden Gate bar pilots, 2436 Balboa street.

Friends of Captain Wallace recalled that at different times both he and his son were masters of the old O'Brien ship J. B. Walker, a painting of which adorns the walls of the marine form of the Chamber of Commerce. The elder Wallace took command of the J. B. Walker not long after she slid down the ways of the famous yards at Thomaston, Me., in 1879, and the son growing up withhim at sea, assumed command of the ship when his father became a bar pilot at San Francisco more than thirty years ago.

Makes Fast Passage

The first voyage of the late J. B. Walker, from Liverpool to the Golden Gate via Valparaiso, has often been set down as a record passage. From the English channel to the West Coast port the ship logged 68 days, and from Valparaiso to the San Francisco bar she was but 34 days. Another feat credited to the J. B. Walker was a round voyage between San Francisco and Liverpool, which she negotiated in eight months and twelve days, carrying wheat out and returning home with coal.

Sold to the Sewalls

For many years the J. B. Walker plied in the Cape Horn and China trades. Her last voyage was from Norfolk to Manilla during the Spanish - American war, when she carried a cargo of coal for the government. She was then purchased by the Sewalls and returned to the East Coast, where eventually she met the fate of all those gallan ships of sail that escaped doom on the deep—that of a barge.

Captain George Wallace had command of the J. B. Walker from 1879 to 1893, when he was appointed a San Francisco bar pilot. His son, John, then took her and continued in command until he, too, became a bar pilot. Before taking command of the J. B. Walker, the elder Wallace was master of the ship Edward O'Brien one of the famous O'Brien fleet, which comprised more than a score of fine wind-jammers. His earlier commands included the schooners Billow and J. R. Bodwell.

LOS GATOS MAN OFFERS FREE COURSE

Beleiving that Charles F. Haanel's "Master ey" will be of great aid to the success of his fellowmen F. E. Seeley, Los Gatos philanthropisa, has purchased a large number of copies of this psychological study and will gladly lend them free of charge to anyone who will agree to read and return the lessons.

While the course is rather expensive, Seeley's desire to promote the study of pscychology has secured him to make the work available without cost to those who wish to study it.

All who are interested should write F. E. Seeley, 90 Fairview Plaza, Los Gotas, enclosing a self-addressed envelope containing four cents in stamps to cover the postage o the first lesson. The lessons must be returned.

RESOLUTION FOR SALE OF SCHOOL PROPERTY

WHEREAS, the Redwood City School District of San Mateo County is the owner of a certain parcel of real property situated in the Town of Redwood City, County of San Mateo, State of California, described as follows, to-wit:

Bounded by Center Street, Pennsylvania avenue and a branch of Redwood City Creek, upon which no public school is being maintained, and

WHEREAS, the Board of Trustees of said Redwood City School District do deem that it is for the best interests of said school district that said property be sold;

Now, Therefore, BE IT RESOLVED And the said Board of Trustees of said Redwood City School District do hereby resolve and declare:

That it is the intention of said Board of Trustees to sell said real property to the highest and best bidder for cash lawful money of the United States and that the minimum price which will be accepted by said board for said property will be the sum of $1500.00, and

BE IT FURTHER RESOLVED AND DECLARED:

That this board will hold a public meeting at the Redwood City Central school on the 4th day of May, 1926, at the hour of five o'clock P. M., at which meeting sealed proposals or bids to purchase said property will be received and considered, each of said proposals to be accompanied by a check or cash in an amount equal to ten percent. of the purchase price offered in said proposals or bids, and at which meeting all sealed proposals or bids which have been received shall in public session be opened, examined and declared by said Board and the property sold according to the provisions of Section 1617½ of the Political Code, provided however that the said board reserves the right to reject any or all bids received.

BE IT FURTHER RESOLVED, and it is hereby resolved and declared that this resolution be published for three successive weeks in the TIMES-GAZETTE, a newspaper of general circulation, printed and published at Redwood City, and

BE IT FURTHER RESOLVED and it is hereby resolved and declared that said property be sold subject to a possible reversionary interest in the estate of Horace Hawes, deceased, and that balance of purchase price be paid upon delivery of deed.

Regularly ordered this 25th day of March, 1926.

JOHN W. POOLE,
President, Board of Trustees, Redwood City School District.

ATTEST: H. STEINBERGER,
Clerk.

Adv. 5-23-25

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA, IN AND FOR THE COUNTY OF SAN MATEO

No. 11621

Action brought in the Superior Court of the State of California, in and for the County of San Mateo; and the complaint filed in said County of San Mateo in the office of the Clerk of said Superior Court.

JAS. T. O'KEEFE, Attorney for Plaintiff.

WALTER T. BROWN, Plaintiff

VS

YSABEL BROWN, Defendant

The People of the State of California Send Greetings to:

YSABEL BROWN

Defendant,

You are hereby required to appear in an action brought against you by the above named plaintiff, in the Superior Court of the State of California, in and for the County of San Mateo, and answer the complaint filed therein within ten days (exclusive of the day of service) after the service on you of this Summons, if served within said county, if served elsewhere within thirty days.

And you are hereby notified that if you fail to so appear and answer, the plaintiff will take judgment ior any money or damages demanded in the complaint as arising upon contract, or will apply to the Court for any other relief demanded in the complaint.

Witness my hand and the Seal of the Superior Court of the State of California, in and for the County of San Mateo, this 20th day of January, A. D. 1926.

ELIZABETH M. KNEESE,
(SEAL) Clerk.
By A. M. BULLIVAN

Pirate Pilot Quite Optimistic

Photograph shows, left to right, Rhyne and Waner, two rookies the Pittsburgh Pirates paid a goodly sum for.

Bill McKechnie, veteran pilot of the Pittsburgh Pirates, can "see no reason" why his club should not repeat this season its triumphal march of 1925 through the National league and again capture the world's championship.

"Our chances for winning another championship are extremely bright," McKechnie said to the Associated Press. In addition to the same players who defeated Washington in the last world's series, the club has been strengthened greatly by addition of Paul Waner and Hal Rhyne from San Francisco.

"Waner is a wonderful hitter and will be in left field on opening day, replacing Clyde Barnhart. Rhyne has shown exceptional ability at second, third and short. Even if he should not crowd out Eddie Moore at second base, he will make a valuable utility infielder.

"In the pitching department, Sheehan has shown enough to warrant saying he will be of great service this season. Of the newcomers, Crowder and Songer give every indication of being major league timber.

"I feel we have the hardest hitting and best base running club in the National league. Backing this up with such fielders as Wright, Traynor, Carey and Cuyler and better than average pitchers, I can see no reason why we should not repeat in the National league and successfully defend our laurels against the American league champions next fall."

Total Paid Attendance at New Madison Square

Boxing, now in the class with "big business," brought a return of nearly one million dollars to the new Madison Square garden corporation for the winter campaign just closed.

Sixteen ring shows, held in Tex Rickard's new arena between December 11 and March 25, drew total gate receipts of $934,619, according to official figures just made public. The total attendance was 226,701. The average "gate" was $58,414, and the average attendance 14,169.

The largest total paid attendance, 17,977, registered at the season's closing show with Young Stribling and Jimmy Slattery as headliners, also set a record for indoor boxing anywhere in the country.

Coach Predicts End of Scouting in Football

Football scouting some day will be outlawed by the principal educational institutions of the country, in the opinion of Marc S. Catlin, coach of Lawrence college football. When scouting, particularly in football, has been abolished athletics will have been placed on a much higher plane, Catlin says.

The present practice is not only costly, he points out, but it defeats the elementary purpose of athletics.

"Athletics are intended to develop the mind as well as the body," he contends. "Under the system now employed the player does not have to exert his intellectual powers to any great extent. It is a battle of wits between coaches, not players."

Dislikes Resin Ball

Bob McGraw, new Brooklyn pitcher, obtained from the Minneapolis club of the American association, is another flinger who does not believe in the "resin bag." "The destiny of the game does not hang in the balance whether or not pitchers use a foreign substance," said McGraw the other day. "Most hurlers do not like the stuff, anyway. It may possibly help in throwing a 'sailer,' but otherwise it's results are nil. They can legislate it out of the game entirely, as far as most of the pitchers are concerned."

Coed Javelin Star

Coeds at the University of Southern California have taken up javelin throwing as a sport which produces grace in action and figure. Several talented contenders have been developed. Photograph shows Miss Lillian Ludwig poised for the javelin throw. She is the star javelin thrower of the university.

Injury Helps Golf Star

George Duncan has entered on a new era of his golfing career and is playing better than for years. Some years ago Duncan damaged his right knee and to ease the strain altered his stance, placing the right foot behind the left, which considerably affected the direction of the ball when using an iron. He had his knee treated by a well-known bonesetter, and his iron play immediately improved. Instead of the ball drifting away to the right every shot now flies straight.

Spring's Sure Cure

All breezes are coaxing Hughey Jennings (above), New York Giant's coach, back to health at a sanatorium in Asheville, N. C. Even now Hughey looks able to bawl out a whole string of rookies.

BASEBALL SQUIBS

Richard (Mutt) Williams will pitch for the Marshall team of the East Texas league this season.

• • •

The resin ball will not be used in the American association this season, President Hickey announces.

• • •

They say when Rhino Fothergill lines up next to Ty's new midget catcher they look like Jonah and the whale.

• • •

Tulsa of the Western league has released First Baseman Arbelter, a Kansas City semipro, and Webb and Lane, kid pitchers.

• • •

The Portland club of the New England league has signed William F. Drummey, a right-handed pitcher, who hails from Boston.

• • •

Sale of Joubert L. Davenport, left-handed pitcher of the Chicago White Sox, to the Chattanooga Southern association club is announced.

• • •

Russ Young, promising catcher of the Milwaukee club, suffered an injury to a knee at the Hot Springs camp which may keep him idle for a month.

• • •

The Macon club of the South Atlantic league has signed Breezy Winn, left-handed pitcher, who was with Wichita Falls and Spartanburg last season.

• • •

If they'd quit taking photographs of Babe Ruth for a few days he might have a chance to get into form. Looking a camera in the eye hits no home runs.

• • •

The Milwaukee club of the American association has sent First Baseman Pep Young and Outfielder Jack Johnson to the Springfield club of the Three-I league.

• • •

Manager Joe McCarthy of the Chicago Cubs has unearthed a speed demon in Floyd Scott. Floyd is a faster man than Cliff Heathcote and Melker in a 100-yard dash.

• • •

The Springfield club of the Eastern league has made a deal whereby Outfielder George Le Beau goes to the Evansville club of the Three-I league for Outfielder Conley. Conley was sent to Evansville last year by the Springfield club.

• • •

The Brooklyn club has sent Lloyd Andrew Brown, left-handed pitcher, to the Memphis club of the Southern league on option. He is the lad the Robins got from Ardmore of the Western association late last season.

BOLEY KEPT OUT OF BIG LEAGUES

Oriole Star Spends Best Years in Minors.

Joe Boley, of Baltimore, who has spent the best years of his life waiting for some major league club to be successful in the age-old quest for his services, apparently is lost to the big leagues for all time.

He will not become a member of the Brooklyn Dodgers as had been expected. That much is certain.

Joe Kelly, Robbie's chief lieutenant, recently returned empty handed from Punta Gorda, the Oriole training camp, and his report eliminated the last, flickering hope that a deal for Boley might be consummated.

According to the Dodgers' emissary, Jack Dunn needs Boley more than ever he did and that is going some. Several years ago Dunn refused $100,000 for the shortstop and he remained in the International league, while other and less likely prospects went on up to the big time and made good.

This time, Dunn's objection was said to have been based on the fact that he is confronted by a very serious hold-out problem, Boley being the only real infielder in the Oriole camp. This statement indicated that Boley's services might have found their reward on a big league team, at last, if it wasn't for the state of affairs existing on the Baltimore ball club.

Fate, in other words, again has stepped between Boley and the honor his all-around ability merits.

Sporting Squibs

California had nearly 2,300 pugilists registered in 1925.

• • •

Tommy Burns was the smallest pugilist who ever held the world heavyweight championship.

• • •

Boston arena will add a balcony, giving a seating capacity of 16,000 for hockey and other winter sports next year.

• • •

Keith Molesworth of Washington, Iowa, was elected captain of the Monmouth college basket-ball team for next season. He will be a senior next year.

• • •

Percy Collins, Chicago, holder of the Midwestern amateur 18.2 balkline billiard championship, has retained his title by winning the annual tourney.

• • •

Harold Osborn of Chicago, all-around Olympic champion, won six of the eight events in which he was entered at the Havana university games.

• • •

Portland, Ore., is to have a modern stadium in which to stage football games and other athletic events. The Multnomah A. C. is sponsoring the project.

• • •

Fred Lamprecht of New Orleans, Tulane university student, won the Gulf States golf championship, defeating J. C. Lebourgeois of New Orleans, 4 to 2.

• • •

Eldon Mason of Minneapolis, running guard on the Minnesota basketball team for the last two seasons, has been elected captain of next year's Gopher floor squad.

• • •

The historic American Derby, last run in 1904, will be revived July 10 at the new Washington park, Homewood, Ill. The value of the classic is placed at $100,000.

• • •

George Slawson, a one-legged high jumper, who recently competed in a triangular indoor track meet with the teams of Cornell, Dartmouth and Harvard, has a record of clearing the bar at 6 feet 1 inch.

• • •

Claim has been made that the Chinese were the originators of polo. It is said that polo was played in China during the T'ang dynasty, about A. D. 600, and the theory is that the Chinese learned the game from the conquered Tartars.

New Speed Record

Here is shown Bob McDonogh, youthful speed king, who shattered the world's velocity record for automobiles at the Culver City (Cal.) speedway, when he circled the track at the terrific pace of 143.3 miles an hour.

Quick Finish to Feature

There was a quick finish to the feature bout at Wolverhampton, England, recently when Jack Snell knocked out Piet Brand of Holland in two minutes, ten seconds, of the first round. The men got to close quarters at the sound of the opening gong, Snell using left and right freely on the body and jaw with little or no response. Brand was soon forced on the ropes, and was driven from one corner to another until he went down and out.

MISS MORGAN

Synopsis.—Idly fishing Hermanos creek, in California, Caleb Warner, civil engineer, and a New Englander, is witness of the end of a coyote pulled down by two wolfhounds, urged on by a girl rider. Admiring the hounds, he introduces himself, and learns her name is Clinton. With western hospitality she invites him to the ranch to meet her father. At the Clinton home Warner learns his new friend's name is Betty. He is welcomed by her father, Southern Civil war veteran and owner of Hermapos valley. Warner tells them something of his ambitions and his feeling that he is destined to be a "Water-Bearer." In the town of Golden Warner shares an apartment with his old Columbia college chum, Ted Baxter, carefree and somewhat dissipated youth, only child of his widowed mother, who controls the family fortune. At a club luncheon Baxter introduces Caleb to Wilbur Cox, leading business man and president of the water company which supplies the needs of Golden. He gives Cox an inkling of his ambitions, and Cox, impressed, invites him to dinner that night.

CHAPTER IV—Continued

—5—

The dinner was served in one of the private dining rooms of the club, known as the Red room. The guests were those of the luncheon, with the addition of young Cox and Caleb. It appeared that they had been in some conference that afternoon and that the dinner marked the end of satisfactory arrangements. The talk was all of mutual interests, Big Business.

It appeared that the afternoon's conference had been called in connection with the threat of other Californian cities to wrest from Golden its supremacy as the metropolis of the Pacific coast. The great fire, following the earthquake, had given them opportunity to creep up in population and general progress. Los Angeles was the most formidable competitor, with Oakville, across the bay from Golden, once only thought of as a suburb of the peninsular city but now, as the actual terminal of transcontinental railroads that ended at deep water, an active rival.

With so small a party Caleb was in easy earshot of the conversation. His interests naturally centered on Wilbur Cox and they quickened at the mention of water supply.

"The board of public works will approve the plans for filling the mains with salt water from the bay in case of any big conflagration," said Cox. "That will not only obviate any repetition of disaster through the conduits breaking between here and the reservoirs, as they did in the quake, but will prove a saving."

Jack Cox turned back to Caleb.

"The governor insists that the vital thing the matter with Golden's growth is the question of adequate supply," he said in an undertone. "Naturally he concentrates on that point."

"Is there a shortage?" asked Caleb.

"Likely to be, they tell me. Better quiz the governor if you're interested. He'll pour out information on that subject like a water-gate once he gets started."

Here was food for thought. Water shortage meant water development. It might mean an opportunity.

"The government project will take years to put through," the host was saying. "Meantime we've got to get busy."

"We're leaving that end of it to you, Cox," said Winton. "Conserving water, buying and selling water—at a profit is your business."

"A reasonable profit."

"And a reasonable dividend," capped Winton with a dry smile.

The dinner was not protracted. And it broke up completely. These men seemed all to have definite things to do even at the close of the day. The guests shook hands affably with Caleb.

"An engineer? Intending to locate here? You'll find plenty to do." Such was the consensus of their greetings. The result was heartening. Out here in the West they seemed to accept a man as efficient until he proved himself otherwise, he decided. In the East it was different. A stranger would stay years on approval, almost under suspicion, until he made good.

Jack Cox invited him to visit Imperial valley, as his guest, to see what had been done there and Caleb responded in kind to the cordiality and evident earnestness of the solicitation. But he had an idea—Baxter would have called it a hunch—that he would do well to stay in Golden for a while. And cultivate Cox. His Yankee mind suggested that here was a direct opening.

Cox widened it.

"I am in town for a few days," he said. "You must come up to my office for a chat over things. And perhaps you would like to look over the Crystal Springs property? Our head engineer makes regular tours. He goes Tuesday, by the way. I can arrange with him to show you round. We have some dams there that he is justly proud of. The line of earthquake fault ran right through them, and—you can see for yourself how they stood it. How about it?"

Caleb accepted eagerly. He had heard of the Crystal Springs dam. Its resistance to the temblor had been the world talk of engineering.

"I shall be glad to come and see you," he said. "And glad of the chance to see the property. Thank you."

"Good! I shall expect you then. I hope you have enjoyed yourself."

Young Cox paired off with his father as the guests dispersed, and Caleb decided to walk home. An attendant gave him an envelope with his coat and hat. It was a card to the club, good for six weeks, applied for by Baxter and countersigned by Wilbur Cox. Caleb slipped it into his pocket gratefully. It was late before he turned in. Baxter was still out—playing his "game."

On his mahogany bureau there was ranged a galaxy of youth and beauty, the faces of about a dozen girls—the number varied—whimsically framed.

Baxter styled them the "Gallery of the Three Ps." Past, Present and Possible. "I frame the past in gunmetal," he said, "symbolic of spent ammunition. The present partners in the game smile at you from silver, indicative of fair, untarnished happiness. Those of the future, the possibilities, are honored by gold. True it is only plated—but it is gold on the surface—harbinger of dawn, of coming pleasure, of the glow of anticipation. It is the hand that may fall to you in the next

Soon He Was Deep in the History of Golden.

deal, Cal, that holds the real thrill of the game. That is why, when a 'possible' becomes a 'present,' I shift the fair from gold to a silver grading, not that they are less dear, if more familiar, but because the bloom always brushes off the peach when you handle it."

When, the morning after the dinner, Caleb entered Baxter's room to find it, as he had anticipated, untenanted; he noticed a change in the line-up of the "three Ps." One of the gold frames had been put away. One of the silver ones held a new face. It had not been one of those among the "possible," Caleb thought, though he had not paid very close attention to Baxter's gallery. This girl had, it would seem, capitulated too quickly to have ever been classed as a "possible."

Caleb surmised it was the blond stenographer whom Baxter had termed the "peach," with whom he was now playing the "game." In the photograph there was a suggestion that the bloom of this peach was artificial. The face was petulant, fond of pleasure, disinclined to count the cost. Caleb idly fancied that the eyes held possibilities of storm that would be more than just a rain of tears on occasion, that the mouth could become hard and sullen if its owner were crossed.

He had breakfast alone in the apartment house dining room. It was Sunday. He thought of visiting El Nido but old custom precluded the idea of a Lord's day social call. He wondered if the public library would be open, thinking that he would like to read up the water history of Golden, of Oakville and Los Angeles, and then he remembered the card in his pocket. The club library should prove adequate. The Altruists was a literary as well as an artistic institution. So he walked down town, to find the place almost deserted. Everyone in Golden, it seemed, made the most of holidays out-of-doors.

There was no one in the library with its easy chairs and big tables, its desks and deep lounge in front of a mammoth fireplace. The walls were lined high with books, well arranged, so that it was little trouble to find what he wanted. Soon he was deep in the history of Golden, with a big map of the Bay region close beside him.

He went to bed early. Sometime in the night Baxter came home. Caleb found him sleeping the next morning, his head tucked on a forearm, handsome but jaded, settled until noon. Caleb waited until Cox should have had time to answer his mail and then presented himself at the offices of the Crystal Springs company. Cox's greeting was cordial.

"Do you mind waiting a few moments?" he asked. He pressed a desk button and a shrewd-appearing young chap entered whom Caleb rated as Cox's secretary.

"Send me a stenographer, Harry, will you?" asked Cox. "I have given you all you can handle and I want to get out some instructions on that cement matter. The stuff is far from standard or contract quality."

The stenographer entered, a girl, quiet, dressed in a dark business suit, deftly taking the dictation given her by Cox in a low, unhesitating voice. Caleb, looking over an engineering journal, hardly noticed her.

"Take this letter," said Cox, then turned to Caleb, as the girl changed a page in her notebook. "I find that Hinckley, our engineer in chief, is not coming in this morning. He will be at Crystal Springs tomorrow, so I am going to give you a letter to him. A car will be here for you in the morning at eight-thirty, if that suits you. I am sorry I cannot give the time to go with you myself."

It was said graciously, with a certain air of assurance that Cox would actually have gone with Caleb if he could have spared the day.

"Now, Miss Morgan," said Cox. "To E. H. Hinckley, introducing Mr. Caleb Warner."

The girl's poised pencil wavered for a second, while her face lifted and her eyes gazed wide at Caleb, then it dipped and automatically inscribed stenographic characters. They were blue eyes and the face one he had seen before. Where? The dress was more demure, the blond hair less fancifully arranged, but there was no mistaking the features, the general expression, startled from business calm to personal interest.

Miss Morgan was Baxter's "peach," the girl whose photograph now occupied one of the silver frames on Baxter's bureau. Baxter was home, asleep, the girl was on duty. There were shadows under her eyes but there was a flush in her cheeks as she stared at Caleb with an interrogation that was almost a challenge, before she bent to her work as Cox went on with the letter.

Caleb imagined what she was wondering. He had been mentioned to her by name by Baxter. She was trying to guess whether Baxter had done the same by her, whether Caleb had seen her photograph, what chance had brought him to the private office and her into it on the same occasion?

Caleb's face showed nothing and, when the letter was ended, he was again reading the journal. Nor did he look up when the girl left at Cox's "that is all, Miss Morgan." He did not wish to embarrass the girl. What she did in her own time was, if it did not prove detrimental to her duties, her own affair—most certainly not his.

She did not return. A few minutes later the secretary came quietly in with the letter of introduction which Cox read, signed, slid into its unsealed envelope and passed to Caleb.

Miss Morgan is evidently Baxter's "peach." A smart girl with a grievance?

(TO BE CONTINUED.)

Idea of Inferiority Not at All Uncommon

The feeling of inferiority is an experience so nearly universal that it cannot be considered abnormal or evidence of disease, declares a writer in Hygeia Magazine. Most of us have had this feeling at some time in our lives, such as when making a speech, undertaking a new job, or taking a prominent part in some social function. The stammering, trembling, palpitation and emptiness of mind which comes at being called on to face a new situation are familiar to all of us.

However, by establishing habits of courage and self-reliance and by learning to attend to the matter in hand rather than to our feelings, most of us have been able to overcome these difficulties. If these feelings of inability to meet the situation are not faced frankly and overcome, one establishes a habit of fear. Then the sense of failure and the feelings of inferiority become habitual, and one's lot will be indeed unhappy.

Java's Jungle Ship

In the midst of a forest in the island of Java, not many miles from the chief port, Batavia, lies a big merchant ship, fully rigged. It is a long way from any navigable water, and is surrounded on all sides by jungle growth. Yet it was not built there.

Visitors who have seen this strange sight have wondered how a ship came into so strange a position, until the explanation was forthcoming.

The island and the whole of that region is highly volcanic, and in the course of one of the gigantic eruptions a tidal wave swept inland for many miles, carrying everything before it. On its crest rode a merchant ship. The wave receded and left the vessel high and dry.

No More Rejection Slips

At last I have discovered the secret. After all these years of heart-breaking, back-breaking, almost fruitless toil to land my manuscripts in print I see ahead the road to success. I have discovered a method of eliminating the rejection slip.

I do not assume all the credit myself. I cannot truthfully say that I am entirely a self-made man. Many are the conscientious editors whose wise words have pointed out the way. Yet it has been my ready comprehension of basic truths, my ability to read between lines, that has brought it all about, and I modestly take myself for all I am worth.

Yes, at last I have discovered the secret, the true method of eliminating the rejection slip. I am going to stop writing.—Kansas City Times.

Doctor Was Right

"Buy a car," said the doctor, "and get out more. You ought to take off pounds."

Speaking of the results obtained by this prescription, the patient says:

"I got a car and got out more. I got out six times between London and Coventry and took off flesh in four different places. Once I got out through the windshield. That seemed to take off the most flesh."—London Tit-Bits.

Alabastine

Time

It's easy

to get perfect walls with Alabastine. Alabastine is a dry powder in white and tints. Packed in 5-pound packages, ready for use by mixing with cold or warm water. Full directions on every package. Apply with an ordinary wall brush. Suitable for all interior surfaces—plaster, wall board, brick, cement or canvas. It won't rub off, properly applied. Ask your dealer for color chart and suggestions or write Miss Ruby Brandon, the Alabastine Company, Grand Rapids, Mich.

Nature's own body builder

"Six months ago life was unbearable, I was nervous and rundown. No sleep, no appetite. Since taking Tanlac I enjoy steaks, pastries, etc., sleep like a log, gained 10 lbs." Miss Helen Ferry, 1201 N. Broadway, Indianapolis, Ind.

Tanlac is Nature's greatest tonic and builder. Made from roots, barks and herbs after the Tanlac formula, it revitalizes the blood, tones up the digestive organs and puts the whole system in fighting trim.

Don't go about your work sickly and discouraged. Take the example of millions who have been helped by Tanlac. Stop at your druggist's today and get this wonderful tonic. You'll be surprised how quickly you improve. For constipation take Tanlac Vegetable Pills.

MRS. BASSETT ALWAYS TIRED

Now in Good Health by Using Lydia E. Pinkham's Vegetable Compound

Lansing, Michigan.—"I have taken Lydia E. Pinkham's Vegetable Compound whenever I needed it. When I first used it I was so bad I could hardly walk across the room without crying. I was tired all the time. I think my trouble was coming on me for six months before I realized it. I read of your wonderful medicine in the paper, and * * * my husband bought me a bottle, and after the first few doses I felt better, so kept on taking it until I was well and strong. I take it at times when I feel tired and it helps me. I will always have a good word for your medicine and tell anyone what good it has done me. I recommended it to my neighbor for her girl, who is sixteen years old, and it was just what she needed. She is feeling fine now, and goes to school every day."—Mrs. E. F. Bassett, 216 South Hayford Avenue, Lansing, Michigan.

Do not continue to feel all run-down and half sick when Lydia E. Pinkham's Vegetable Compound is sold by druggists everywhere. It is a root and herb medicine and has been used by women for over fifty years.

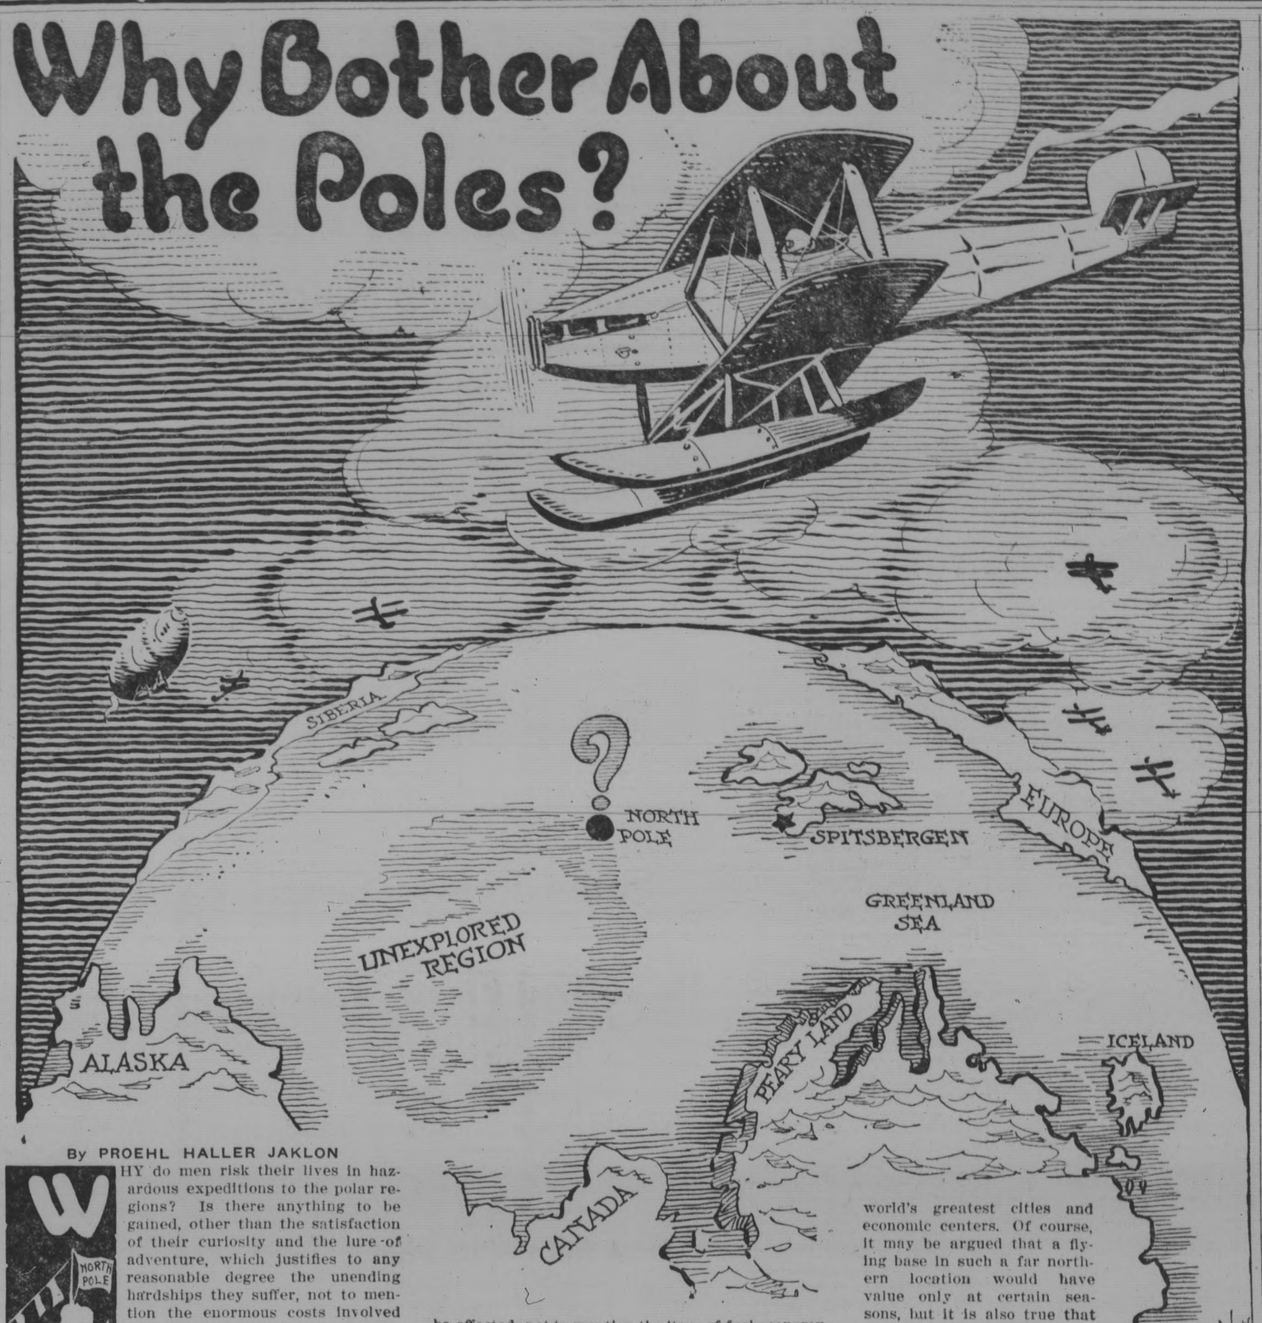
Why Bother About the Poles?



By PROEHL HALLER JAKLON

WHY do men risk their lives in hazardous expeditions to the polar regions? Is there anything to be gained, other than the satisfaction of their curiosity and the lure of adventure, which justifies to any reasonable degree the unending hardships they suffer, not to mention the enormous costs involved and the long months of preparation and study necessary even before a start is made?

Most of us regard a polar dash as a spectacular stunt, full of thrills for the few who engage in it and anxiety and uneasiness for those who remain at home. What's the use of exploring and charting new territory whose area is more than a million square miles if this land is only to be found buried under tons of ice centuries old?

It is obvious, however, with three costly expeditions planned and one already in the field that there is some sound reason behind all this effort, something more important than the charting of that spot on the map which now is a blank marked "Unknown Area."

From John Tilghman Rowland, fellow of the American Geographical society, writing in the New York Herald-Tribune, comes some very logical reasons concerning the importance of polar exploration. He believes that we who live in North America have a vital interest in these great adventures. A hundred years from now he intimates, it is not unlikely that historians will view these expeditions in the same light that we now regard the epochal voyages of the Fifteenth and Sixteenth centuries, when Columbus and Magellan, as well as many other daring navigators, discovered those more temperate parts of the earth, paved the way for colonization and thus changed the history of the world.

We must realize that the age we live in is an age of rapid transportation, both of persons and things, and ideas. Distances have been annihilated by man's ingenuity, and journeys which not so long ago were reckoned in days and weeks are now thought of in terms of hours and days. It took our forefathers thirty days to cross the Atlantic; we speed across it today in from five to seven days in luxurious ocean palaces, or hop across in an airplane in less than two days. The barriers between nations have been broken down, and man finds the world today a much smaller place than the world of yesterday.

Now Mr. Rowland asks us to glance for a moment at the above map, which, although not drawn accurately to scale, will serve our purpose. Do you notice how all the countries of the northern hemisphere are grouped around the Arctic ocean? There's Russia (Siberia) and Canada facing each other across the diameter of the Arctic ocean. Ordinarily we think of them as being widely separated. The tip of Alaska nearly touches Siberia. Norway and Sweden, by this route, find themselves not at all so distant from the Far East as they have hitherto supposed. It's really just a hop over that part of the horizon which lies under the pontoons of the larger airplane in the above picture. Thus, the Arctic ocean is truly a new Mediterranean, geologically as old as time; but strikingly new as a factor in the affairs of men. On this ocean Europe, Asia and America all have frontage, which, if the climate of the Arctic were reversed, would have been bordered long ago with thriving cities and shipping centers. Imagine this ocean free of ice so that it offered no obstacles to the passage of ships. Immediately new trade routes would be opened. Vessels, both freight and passenger, which now ply between European ports and those of Asia via the Suez and Panama canals or around the Cape of Good Hope, plowing through endless miles of the world's widest oceans, would take a new short-cut across the top of the world. Sailing northward between Greenland and Spitsbergen, they would steam quickly across some place not far from the pole and descend into the Behring strait. After holding their course southward for a few days they would reach the ports of Korea, China, and Japan. Enormous savings in fuel, time and distance would be effected, not to mention the item of fuel economy.

Short lines of communications would spring up also between Canada and Russia, Alaska and Norway, and northwestern Europe and Siberia. The Arctic ocean would be alive with ships, and those nations would realize that their Arctic coasts were by far the most important they possessed. This, Mr. Rowland says, would mean not only commercial but military readjustments on a huge scale, for in the future whoever controlled that ocean would hold the key to world trade.

Of course, nobody expects the climate of the Arctic to undergo this radical change, but there is the possibility, however, that within a relatively short time we shall produce ships of a kind that will recognize no such barrier as the Arctic offers, for the good reason that ice is no obstacle to a ship navigating the air.

We have the assurance of aviation experts that polar air routes are feasible and that such flights can be made if someone will explore the entire Arctic basin and find out in particular the nature of the great unexplored area. This done, we can expect the day when giant planes will fly from England to Japan in forty-eight hours. Such a trip would require a speed of not more than 100 miles an hour.

How can this unknown area be explored? Northward from Alaska, in the center of the Arctic ocean, lies a million square miles of territory, the nature of which we know nothing. The Arctic ice bars out ships, dog teams cannot cross it, for the distances are too great. Here and there the edges have been scratched by our adventurous explorers, who have been forced to admit that this mighty area defies penetration.

The one remaining way to conquer this region is through the air. Two years ago the chances against the airplane were heavy, but today with better steering instruments, improved planes and motors, and a better knowledge of Arctic conditions, the chances are strongly in favor of the air route. Conditions most favorable for the flight are found in the early spring. The day is twenty-four hours long. Thick snow underneath, instead of melted snow and open water, affords adequate landing fields, and in April and early May the Arctic air is less obscured with fog than at any other time of year.

What explorers want most to find in this unknown area is solid earth. If land is there and if it offers safe landing places for aircraft, its discovery will be an event of world-wide importance. It will permit the establishment of supply bases, lighthouses and radio stations to guide the pilots of future air liners. With fuel and food near at hand no airship ever would be more than a few hours from help in this polar desert, and the risk of such travel would be cut in half. Those who have visited the Arctic are inclined to believe that such land exists. They have watched the behavior of tides and currents in the polar basin, which would indicate the presence of land. They have seen migratory birds fly straight out to sea just before their nesting season and disappear over the far horizon.

Discovery of land there would have an important military significance. Station a fleet of speedy bombing planes upon the new land and they would command an international area. Alaska and northwestern Canada would be completely at their mercy and only upon these planes' supply of fuel would rest the security of Great Britain, central Europe, Scandinavia and Japan.

No other spot on the earth is equidistant from so many important points. Place one point of a pair of dividers on this unknown area and the other point somewhere on the fortieth parallel of latitude in the northern hemisphere. Using the first point as a center, you can describe a circle which for the most part will include the world's greatest cities and economic centers. Of course, it may be argued that a flying base in such a far northern location would have value only at certain seasons, but it is also true that aggressor nations generally choose their own time to strike. It is not without the bounds of imagination to foresee the world threatened by some predatory power which had acquired the new land.

All nations in the last few years have begun to show increasing interest in their Arctic possessions. Canada has declared sovereignty over all lands between her northern coast and the pole, yet not a few of them were discovered by explorers sailing under the flag of the United States. This new principle of sovereignty ought to give the United States a title to all lands lying north of Alaska, but it cannot be relied upon to have this effect. Those who have studied the problem urge that the United States and Canada join forces in these matters. The right of a nation to the territory it discovers is not yet outlawed, and if new discoveries tend to disrupt world peace some definite policy, such as internationalization of the new land, must be agreed upon.

This year America will be represented in the dash to the pole. Commander Richard E. Byrd of the United States navy, on leave, who commanded the navy flyers in the Arctic last summer, has chosen Spitsbergen as a hopping-off place. From here he goes to the northernmost point of land in the world, a promontory in Greenland. After a base has been established at this place, he will return to Spitsbergen for additional fuel and supplies. He will then return to the Greenland base and fly to the pole, then either to Spitsbergen direct or via Greenland, as circumstances dictate.

This expedition has been financed by such men as John D. Rockefeller, Jr., Vincent Astor, Thomas F. Ryan, Richard Hoyt of New York, Edsel Ford and Congressman Frothingham of Massachusetts and several others. Explaining the details of the expedition in an article in the New York Times, Commander Byrd said:

"My plan is to do the flying in a series of legs of about 400 miles each. Careful calculation indicates that, with the three motors, the chances are about 500 to 1 against breakdown due solely to motor trouble on any single leg of the flight.

"On our flights on the MacMillan expedition last year we operated near water, because we could not safely land on the ground. It was August, and the snow had largely melted away. Flying in the spring, however, we will carry skis and will land and take off by skiing on the ground.

"The objective of our first flight will be the first landing field we can find on Peary land, the northernmost known land in the world. It is at the extreme north tip of Greenland, about 400 miles northwest of Spitsbergen. We will stop at the first spot on Peary land that promises good skiing for the plane.

"Here it is our intention to deposit 1,000 pounds of gasoline, food and supplies. Then we purpose to fly back to King's bay, load up and return to our Peary land air base. Our exploration of unknown areas in the Arctic begins with our flight from Spitsbergen to Peary land. Most of the region between the two places is unexplored.

"After our second flight to Peary land we will be ready to make the attempt to fly to and around the North pole. Our objects are to explore the unknown stretch of about 400 miles from Peary land to the pole and possibly to accomplish the sporting feat of reaching the pole from the air.

"From our projected base in Peary land it is approximately 400 miles to the pole. If we reach the vicinity of the pole, our instruments will enable us to determine, while in flight, our location within a margin of twenty miles. To make sure that we have reached and passed the pole, we will make a wide circle around it. This circle would be less than 100 miles in distance, but it would be a complete circumnavigation of the globe."

Nature Has Own Way of Scattering Seeds

Nature has various clever devices for scattering seeds. Those who walk through a field and find burrs attached to their garments have been made her involuntary carriers. The thistledown is an example of the large class of devices that, like parachutes, send the seeds on long voyages, and many seed pods have hooks whereby to attac[illegible] waiting of swimming birds. In the state of Washington experiments are in progress in connection with reforestation, to determine how far the seeds of the Douglas fir will carry. Set adrift from a kite at a height of 175 feet, they have floated on their own wings, as a maple seed might voyage, to a distance of 1,600 feet, where they were collected on squares of canvas spread for that purpose. The breeze blew at a rate of eight miles an hour. Many seeds were found at 1,100 feet, and it is estimated that 80,000 were thus broadcast over an acre. Those who are replanting areas where logging operations had cut broad swaths in the woodland intend to profit by the results of the experiments.—Exchange.

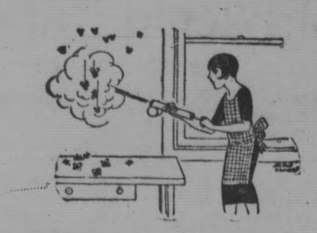
No Great Bell Ringer

Possibly the greatest bell ringer was a Belgian, Matthias van Gheyn. He died in 1785, and with him the highest art of bell ringing apparently came to an end, as no one has been found capable of playing the bell compositions which he has left. The great belfry of Bruges has 40 bells, while Mechlin has 44.

One can scarcely believe the number of changes that can be made on a peal of 12 bells, but it is stated on reliable authority that it is possible to ring 475,000 changes.

Middle-Age Masticating

Jackdaws, magpies, hedgehogs, cranes, peacocks and swans were popular dishes in the Middle ages.



Fly - Flit - Flop!

FLIES breed in filth, feed on filth and bring filth into your home.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills *all* the insects—and does it quickly.

Get a Flit can and sprayer today. For sale everywhere.

Use of Telephone Grows

The United States, with a population of 114,000,000, now uses the telephone 63,000,000 times every day. It is interesting to note that in 1900 but 7,000,000 conversations daily were tabulated, while today nine times this number of telephone conversations are recorded.

Garfield Tea

Was Your Grandmother's Remedy

For every stomach and intestinal ill. This good old-fashioned herb home remedy for constipation, stomach ills and other derangements of the system so prevalent these days is in even greater favor as a family medicine than in your grandmother's day.

ASK FOR ALLEN'S FOOT-EASE for TIRED, ACHING FEET

W. N. U., San Francisco, No. 18--1926.

Just Boys

"I got 'Suwannee Rver' last night on my daddy's radio."

"I got hail Columbia for trying."

A philosopher can do without a good many things, but his logical mind is essential to his happiness.

Children Cry for

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of Chas. H. Fletcher. Absolutely Harmless - No Opiates. Physicians everywhere recommend it.

News of Menlo Park

Menlo Theatre to Open May 7

Boyd Braden will open the new Menlo Theatre next Friday, May 7, with an appropriate program. A local speaker will begin proceedings after which pictures of old-time scenes of Menlo Park and groups of children, now grown-ups and numerous pictures of old timers will be thrown upon the screen Pictures taken fifty years ago are to be filmed This part of the program will be interesting. "King of the Turf" is to be the main picture and it is to be shown for the first time on the Peninsula. It features Mary Carr. The pictures depict a southern love story ending with a steeple chase. The new theatre has cost the owner close to forty thousand dollars A new organ costing $10,000.00 has been installed. A beautiful drop curtain appropriately painted showing General Fremont, the pathfinder, in his march through Menlo Park in 1857 is being placed in position. The general camped on the Selby ranch for a week that year on his way from Monterey to the Presidio in San Francisco. Camp Fremont was named after the Pathfinder. Nicely cushioned seats, comfortably arranged and sixty modern loges have been placed in the theatre having a seating capacity of 450. On either side of the foyer are rest rooms for both ladies and gentlemen. The theatre is the last word in equipment.

Mr. Braden intends to give two shows each evening of the 7th and 8th of May. He plans to give give two shows every evening with a vaudeville performance once a week. He deserves the thanks of the people of Menlo Park for giving them such a fine place of amusement. Evsry one here should show their appreciation by liberally patronizing the New Menlo. Philip Zenovich of San Francisco will preside at the organ on the opening night. He is a noted musician.

Successful Operation

The deft scalpel of the plastic surgeon has removed the blemishes on the former handsome face of Doctor Thurlow Miller, a former resident of Menlo Park and a half brother of R. E. Miller of Atherton. The operation was performed by a specialist in Los Angeles recently. Dr. Miller in 1923 plunged through the windshield of his automobile in an accident at Tracey. His face was badly mutilated and partly twisted and his nose flattened. By the wonderful operation his former beauty has been restored and his facial appearance is as attractive as ever. The doctor is one of the most skilful surgeons and best beloved men in San Francisco.

Rosenfield Home Opened

Henry Rosenfield, the multimillionaire, has opened his beautiful home at Atherton for the summer.

Planning to Merge Offices

The American Rail way Express Company is planning to merge the Palo Alto, Redwood City and Menlo Park offices with the main office at Menlo Park. The company owns its building here with all the equipment and the building is so situated near the railroad tracks that all the business can be handled with dispatch. The facilities are most excellent for the handling of a large volume of trade. The distribution will be in charge of the agents now in Redwood City and Palo Alto, with J. J. Tuttle superintendent over all The new system will take effect very soon. Mr. Laflin, the Palo Alto agent, is seeking a home here. He now resides at North Fair Oaks.

Travelers Dined

Miss Isabel Jennings of Menlo Park has hostess Saturday evening at a dinner party for Mr. and Mrs. Clinton a Montagne, who are soon to leave for Honolulu to make their home.

Johnson Sells Market

R. A. Thompson of Saratoga has purchased the Postoffice Meat Market in the Slinger building on Santa Cruz avenue from Milton Johnson who is to engage in business with his father in Redwood City. Mr. Thompson is an experienced butcher.

P. G. & E. Establish Office Here

The Pacific Gas and Electric Company has established an office for the transaction of business in his locality in the office of the Bear Gulch Water Co. on the highway. Patrons of the company may pay their bills there and leave orders for connections with the system and also to lodge complaints.

Votes $75 Toward Sign

The Menlo Park Improvement Club at its meeting held last Friday night the sum of $75 was appropriated from the general fund to help establish a sign on the highway at the entrance to the town, to contain the words "Menlo Park.' It is to be suitably lighted fat night. Other peninsula towns have such signs, why not Menlo Park have a similar one?

Unusual Amount of Water

There is quite a stream of water running in the San Francisquito creek, something unusual for this time of the year. In the early days before the redwoods were cut in the mountains back of Menlo Park and before dams were constructed across the stream near the headwaters the creek was alive until late in the fall.

M. A. Harris, the capitalist and philanthropist, is the new mayor of Atherton, having been elected to that position at a meeting of the Atherton trustees last Wednesday night. He succeeds Edward L. Eyre, who was the first mayor of the municipality. Heretofore the board met only once a month, but hereafter two meetings a month are to be held, the second and last Tuesday of each month.

Harris Elected Mayor of Atherton

P.-T. A. Card Party Postponed

The P.-T. A. card party which was to have been held Thursday, has been postponed until next Friday afternoon, May 7, at 2 o'clock at the home of Mrs. J. J. Garland.

—oOo—

TO SEEK FIVE POINTS ANNEXATION TO TOWN

Action looking to the annexation of Five Points with Redwood City was started this week with the circulation of petitions in the district asking for this move. The matter was discussed at a special session of the town board Monday and petitions prepared. It is stated that the election will be called as soon as possible.

LOCAL HOMING PIGIONS TO FLY FROM PLACERVILLE

The Redwood City Homing Pigeon Club, an organiaztion of pigeon fanciers of this district, will hold their first race tomorrow, when 150 birds from this section will be liberated at Placerville for a race of 120 miles. The club has been in existence for several months and has tried short flights from Niles, Contra Costa, Stockton and other nearby points. Placerville is the farthest flight essayed so far by the birds.

Six local pigeon raisers will compete in the race tomorrow, they are Joe Dupret, G. F. Walker, Charles A. Mischo, G. P. Perry and J. B. Burns. George Walker is president of the pigeon club and J. B. Burns is its secretary.

Frazer & Co
PALO ALTO

ONE 1¢ CENT SALE!

WHAT IS ONE-CENT SALE?

IT IS A SALE where you buy an item at the regular price, then another item of the same kind for one cent. As an illustration: The Standard price of Klenzo Dental Creme is 50c, you buy a tube at this price and by paying 1 cent more or 51cents, you get two tubes. Every article in this sale is a high class standard piece of merchandise, just the same as is sold every day at the regular price.

A PROFIT-SHARING METHOD OF ADVERTISING

THIS SALE was developed by the United Drug Co. as an advertising plan. Rather than spend large sums of money in other ways to convince you of the merit of these goods, they are spending it on this sale in permitting us to sell you a full size package of high standard merchandise for 1 cent. It costs money to get new customers, but the loss taken on this sale will be well spent if the goods please you.

This Sale Will Be Held at Both of Our Store
Thursday, Friday and Saturday
MAY 6th - 7th
